

Cable Preparation Tools

Tools for preparing high-voltage cables

The tool that does it all with absolute precision

Part No: POLY-SCP

- Stripping outer sheathing
- Scoring strippable semi-conductor
- Stripping insulation
- Capacity: 35mm² to 630mm²
- Suitable for most materials e.g. XLPE/EPR
- Retractable 25mm to 55mm stop
- Replaceable blades available

Graduation wheel at 0.1mm intervals allows precision cutting

Knurled knob for adjusting cutting depth, and indexed to maintain adjustment

Star knob for opening and closing clamps

Blade direction lever for straight or helical cutting

Locknut for maintaining position

Clamps made of high-resistance aluminium alloy

High speed steel interchangeable heel blade for cutting external sheathing and insulation

Graduated stop

Stainless reverse thread screw for fast opening and closing of clamps

Graduated knurled knob in 1/10mm from 0 to 1.1 mm for accurate adjustment of the scoring blade for strippable semi-conductor

Stripping outer sheathing

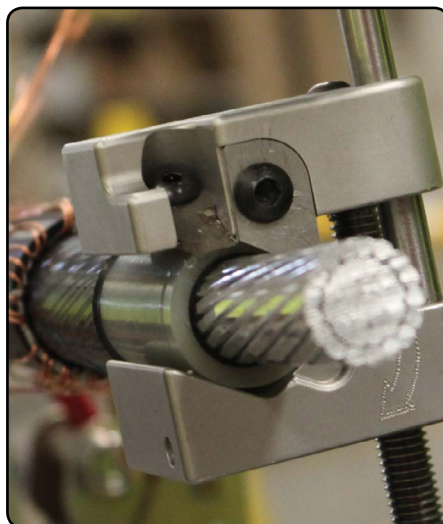

Scoring strippable semi-conductor

Stripping insulation

Cleaner, Faster, Safer.

Put an end to unsafe procedures.
