Sealants

American Polywater® Corporation

Instagrout™
Part No: PMT-1 + PMT-3

Polywater® InstaGrout™ helps prevent outages and service disruptions by creating a resilient and impermeable barrier that keeps out moisture and stops rodents, snakes, and insects from burrowing up through earthen gaps into the pad enclosure. InstaGrout's polymer matrix technology is easy to mix on site, and requires no water.

Field crews combine the pre-measured components and shake or stir for just 30 seconds. The InstaGrout™ Sealant is then poured into the transformer pad opening. The self-leveling mixture spreads out and expands evenly throughout the pad opening and around conduit stub-ups. The only site preparation required is to plug any gaps or holes inside the opening that could allow product to flow outside the pad opening.

InstaGrout™ adheres to fiberglass, polymer concrete, and concrete pads. It tolerates environmental extremes and effectively seals uneven ground. InstaGrout™ will not settle, crack, or cave in like concrete can when performing service work or transformer change-outs.

Polywater® InstaGrout™ Sealant Barrier makes sealing transformer pad openings simple.

Product Benefits
- **Deterrent:** Keeps rodents, snakes, insects, and water from entering enclosures.
- **Easy to Use:** Ready to mix and apply. No water needed.
- **Blocks:** Flows and self-levels before expansion to seal the entire opening.
- **Re-enterable:** Saw or drill after installation to install new ducts or cables.
- **Protects:** Offers permanent protection through weather extremes or change-outs.

Burst Pack

Bottle Pack

Part No	Description
PMT-1	750ml Burst Pack This kit will cover 1 square foot (approx.) at a 75mm depth
PMT-2	1500ml Burst Pack This kit will cover 2 square foot (approx.) at a 75mm depth
PMT-3	Bottle Pack This kit will cover 3 square foot (approx.) at a 75mm depth
PMT-4	Bottle Pack This kit will cover 10 square foot (approx.) at a 75mm depth
