

Foam Duct Sealant

One Polywater FST-MINI cartridge seals approximately TEN x 25mm ducts

BENEFITS

- **Strong:**
Holds up to 7m of water head pressure
- **Compatible:**
PVC, HDPE, Rigid Steel, EMT, Fibreglass, and Cable Jackets
- **Easy:**
Two-part foam is mixed in nozzle as it is injected into duct
- **Quick:**
Foam expands and cures quickly even when water is present
- **Multi-Use:**
Packages are resealable

98% closed Cell content

Polywater FST™ MINI Foam Duct Sealant for Conduit Sizes 20 to 50mm

Effectively Seals Small Conduits and Innerducts

Polywater® FST™ MINI is an expanding, quick-setting, “closed-cell” foam that is injected into a conduit to provide a watertight seal. The seal is superior to pliable duct putties and “open-cell” aerosol canned foams.

Recommended for small conduits (less than 40 mm)

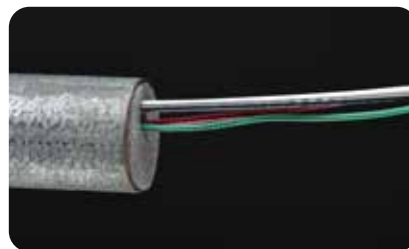

Part No	Description
FST-MINI	1 x 50ml FST Cartridge 2 x Mixing Nozzles 6 x Foam Discs 1 x Pair of gloves 1 x Instructions
FST-MINI-1G	FST-MINI + 1 x Application Tool (TOOL-50-11)

FEATURES

- FST Duct Sealant™ has 98% closed-cell content for increased strength and resiliency
- FST Duct Sealant™ resists seven meters of waterhead pressure
- FST Duct Sealant™ is compatible with cable and duct materials
- FST Duct Sealant™ is chemically resistant to gasoline, oils, dilute acids and bases, and most unsaturated hydrocarbons
- Prevents the passage of gas; does not sag; will not dry out; and is re-enterable
