Non-Contact Voltage Test Pencil - KLEIN

Part No. NCVT-3

Non-Contact Voltage Tester with Flashlight
Put the spotlight on your work

Now you can see what you are doing when detecting AC voltage, even in dark or low-light conditions. The vibrant LED lights provide easy interpretation and viewing of voltage strength. The bright flashlight is practical enough to be used as a stand alone tool.
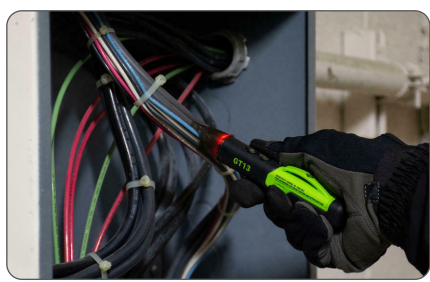

Features

- Non-contact detection of 12 – 1000VAC in cables, cords, circuit breakers, light fixtures, switches, outlets and wires as well as doorbells, thermostats, low voltage lighting and irrigation systems.
- Simultaneous visual and audible voltage indicators.
- Bright flashlight illuminates work area and may be used independent of voltage detection function.
- Bar graph visual voltage indicator utilizes five vibrant LEDs for easy interpretation/viewing of voltage strength.
- The audible voltage indicator beeps at a greater frequency the higher the voltage that is sensed, or the closer it gets to the voltage source.
- "Auto Power-Off" conserves and extends battery life.
- Screw-thread battery cap with o-ring ensures dust-proof and waterproof ingress protection.
- Lightweight, compact tool with pocket clip provides easy storage and quick access.
- IP67: Dust-proof and waterproof
- Drop Protection: 2 m
- Safety Rating: CAT IV 1000V

IP67

ALSO AVAILABLE

Use to detect the presence of voltage at outlets, lighting fixtures, circuit breakers, wires, and cables or to find a break in a wire.

- Bright LED and audible alarm if voltage is present
- ON/OFF switch and Auto OFF for longer battery life
- Convenient pen size fits into pocket or tool pouch
- Replaceable AAA batteries (Included)
- Full circuit self test

Safe, Non-contact voltage detection
