

Quality Tools, Equipment & Line Materials for the Energy Industry.

iToolco All Jack™

Part No. AJ01

iTOOLco's All Jack™ Lifts and Hold your workpiece in place to free up your hands, increasing productivity

Features

Increase productivity and decrease fatigue using iTOOLco's All Jack™.

Install conduits & pipe, cable tray, lights, switchboard cabinets and panels, gyprock and much more with this innovative jack designed to lift and support the weight of your workpiece while you anchor it into position.

High ceilings and ladder work are not a problem for this dynamic tool. **Reach from 1.47m to a staggering height of 4.15m.**

The industrial gas shock ensures a snug, stable support that stays in place while you complete the installation.

Once your workpiece is secured into place, simply remove the All Jack™ by releasing the shock.

More powerful than a typical support pole, the All Jack's gas shock can handle your most challenging jobs.

One handed gas shock operation hold workpiece in place

Perfect for overhead work & supporting conduits and cable tray
