

12 Cal Vented Lift Front Shroud - NSA

PART No. EN123SNTNB01AL

- Arc Rating: 12 Cal/cm²
- NFPA 70E PPE CAT: 2
- Fabrics: 7.5 oz Tecgen CC™
- Standards: ASTM F1506, OSHA 29 CFR 1910.269, NFPA 70E-2018 PPE Cat 1 & 2

The Enespro arc flash 12 Cal Vented Lift Front Shroud is a protective garment designed to provide superior protection against arc flash and other electrical hazards. The vented lift front design helps to increase air circulation and reduce heat stress, while the Optisheild and the chin cup allows for an optimum field of view.

Optisheild™ grey face-shield improves colour recognition

Premium Anti-Fog & abrasion resistant coating

Vented clear chin cup expands downwards increasing the face-shield view

Super Lightweight 7.5 oz Tecgen CC™ Fabric Lined with FR Control 2.0™ antimicrobial fabric

Indirect vents offer improved ventilated & communication even when hood lens is down

3M™ FR Scotchlite™ FR silver & yellow reflective tape

Streamlined design reduces bulk and weight to improve wearer comfort and reduce the risk of heat stress

Features

- Shroud eliminates needed CAT2 balaclava
- Super Lightweight
- Easy lift-front face shield
- Auditory vents for improved sound & communication
- The specially designed lens curves in both directions to optimise field of view without distortion & reduces interior reflections
- Light Kit Compatible
- Made in the USA
