

WHY PARTNER WITH TEN HIRE & SRT?

SERVICING

TEN Hire expanded its services to include SRT (Service, Repair & Refurb, Training), a specialised division focused on providing exceptional service and training.

We understand the importance of maintaining and repairing your valuable capital assets to ensure they operate optimally and have a long lifespan.

Whether its a Tesmec stringing machine or associated accessory, the SRT division is ready to assist you with a thorough preventive maintenance program that guarantees continuous equipment operation.

Our team of highly skilled hydraulic technicians is equipped to handle all your maintenance requirements.

REPAIR

Equipment breakdowns are unavoidable, but when they occur, it's crucial to have a reliable and capable partner to restore your fleet's operations swiftly.

At TEN Hire, we maintain an extensive inventory of Tesmec Machinery parts to ensure prompt repairs. What sets us apart is our ability to provide regional service technicians who are specifically trained by the manufacturer.

Additionally, our team operates within a suitable timezone, allowing for efficient customer service and troubleshooting. When repairs are needed, we prioritise fast and efficient solutions to minimize downtime and get your equipment back up and running promptly.

REFURB

Prolong the life of your valuable Tesmec stringing assets by opting for refurbishment services offered by our SRT Team.

Our experienced team assesses your machinery's age, working hours, overall condition, and any necessary repairs or parts replacements to provide a tailored refurbishment proposal.

Through this process, we can upgrade your machines with additional safety features designed for newer models, ensuring compliance with WH&S regulations concerning high-risk plant.

TRAINING

Our stringing machine operator training is delivered by approved trainers who have undertaken training direct from the manufacturer.

Participants in our training programmes receive a detailed training manual with theory and practical assessments designed to build and confirm operational competency.

Our team are Cert IV qualified in training and assessment and deliver our training package at our site or yours to AQTF standard.
