providing labor-saving **solutions & support**

Good businesses know the importance of productivity and efficiency. That's why we take pride in working directly with the industries we serve to offer tools that are engineered to reduce installation time and increase safety. Condux has the specialized tools to help you do the job right, and do it safely.

Reliable Customer Service

Every tool we sell is backed by our commitment to reliable Customer Service through our international network of knowledgeable representatives and our international Customer Service personnel. You will receive the most reliable customer support available anywhere.

Product Training Seminars

A product is most effective with the proper knowledge and training behind it. That's why Condux offers in-depth product information and hands-on product training. Our outdoor facility has precast manholes, four conduit runs, power poles at the perimeter, handholes, and transformer boxes for realistic training. Participants work in both classroom and hands-on settings, with involvement in a variety of product installations over a two-day period.

CONDUX

To our knowledge, all products and other information in this catalog are accurate at the time of printing. Condux International, Inc. reserves the right to change products and other information without prior notice.

Tools shown in this catalog are designed for their intended use only by trained craftspeople. Before using any Condux tool, make certain you have read and understand any safety, operating, and maintenance instructions for that tool. Call or write for any additional product information required for operation.

GETTING TO KNOW CONDUX

Condux International is the premier manufacturer of underground and overhead cable installation tools and equipment for the telecom and electric power markets. Condux machines allow safe, quick and easy installation of fiber optic and power cables.

Condux manufactures almost everything an installer needs to put fiber optic cable or copper cable in the ground or up a pole. With everything from large fiber optic blowers, hand held cable pushers to capstan based cable pullers, every installation method is catered for.

The most important thing about Condux is customer service. We don't just provide you with machinery and walk away, we are with you every step of the way. We train your staff, we service your machine and we help you get the job done the best we can. Condux's network of representatives and customer service personnel are there to provide the industry's most reliable and knowledgeable technical support and assistance every step of the way.

TRAINING COURSES

Condux International's three day training courses provide a wealth of information for Condux Distributors, Representatives and Contractors/End Users. The course schedule is as follows:

INDUSTRY BASICS

- Applications for Fiber Optic Cable
- Introduction to Installation Types – Aerial, Innerduct, Microduct, Direct Bury, FTTx, etc
- Basic Fiber & Duct Installation Overview
- Duct Types – Traditional Conduit, Innerduct & Microduct
- Entry Points – Pedestals, Handholes, Manholes, etc.
- Basic Fiber Composition
- Industry Terminology

TELECOM DAY

Focused on Telecom installation concepts and equipment featuring both classroom and hands-on training, each trainee will have the opportunity to run our equipment and actually install fiber into duct.

- Gulfstream® Fiber Blower Set Up & Operation
- Fiber Puller Set Up & Operation
- Pressure Testing
- Crash Testing
- Coupler Types & Applications
- Any New Product Introductions

POWER DAY

Focused on Power installation concepts and equipment featuring both classroom and hands-on training, each trainee will have the opportunity to run our equipment and actually install both power cable and pull tape/rope into duct.

- CableGlider Cable Pullers
- *Blue Ox ® Puller
- *WDR505® Puller
- *APS75 Puller
- Winchline Blower
- Duct Rodders
- Pulling Swivels
- Directional Drilling Swivels
- Reusable Power Pulling Eyes & Grips

*Product subject to availability at the time of training. If you require training on a specific piece of equipment, please advise Condux upon registering and we'll make every attempt to accommodate your needs.

Watch www.condux.com for future training sessions.

UNDERGROUND CONDUIT SUPPORT SYSTEMS

ENGINEERED TO ORDER

Additional information available at
www.CONDUX.com

Condux Underbridge Conduit Support Systems

Condux is the world's leading designer and manufacturer of conduit bridge hanger systems. Our expertise spans a complete range of bridge sizes and designs—from the famous Golden Gate bridge in San Francisco to Tampa Bay's spectacular Sunshine Skyway bridge to a large number of smaller bridges all across the world.

Through that **experience**, we can help you with any special design problems you may encounter, and do it in a timely and cost effective manner.

We specialize in **personalized service**, providing you with all of the information and technical assistance you need to get you through every step of your bridge hanger project. As a basic part of our service, when you place an order with us we will assist you with a materials list and a system design layout. We also feature computerized design and estimation for rapid turnaround.

Condux support hanger hardware is manufactured from stainless steel or hot rolled material that has a **hot dip galvanized** coating that meets D.O.T. specification requirements.

The **fiberglass cross members** are manufactured fiberglass reinforced plastic material that is one of the strongest and most durable materials in the world. When you combine these two materials you have one of the strongest and corrosion resistant conduit support hangers available on the market which is supplied by Condux International.

All types of **conduit** (fiberglass, PVC, or steel) are available from Condux, to provide a complete Underbridge Conduit System. No matter what stage of the project you're in, Condux can help you in the most cost effective manner.

The Condux Underbridge Conduit Support Systems & Bore Spacers **Catalog and Design Guide** will provide you with complete information on designing and ordering bridge hanger systems. It is available through our web site at www.condux.com or by contacting Condux Customer Service at 1-800-533-2077.

UNDERGROUND CONDUIT SUPPORT SYSTEMS

Condux Bore Spacers

Encasing underground conduit inside of steel pipe casings is quickly gaining popularity as a preferred method of underground installation. It offers the maximum amount of security for underground cable, effectively eliminating many of the problems that can occur with underground installation. This method is gaining recognition as "The Right Way" to install underground cable. One of the factors that make such an installation work is the proper design of the bore spacers that align and hold the conduit inside the pipe casing. Proper engineering of these bore spacers is critical to the reliability and longevity of the system.

Condux International is one of the largest producers of bore spacers in the United States. We have the experience and engineering expertise to assure the quality of your spacers. Condux Bore Spacers provide the following significant benefits:

Optimum Design—In many instances this spacer will allow the use of a smaller casing for the same number of conduits. The savings from the price of the casing and the installation could actually make the bore spacers "free".

Waterjet Technology—Utilizing computer aided design, the waterjet process is used to produce a cleaner, more accurate bore spacer for less cost and reduced manufacturing time.

Flexibility—Virtually any configuration of conduits and grout holes can be quickly manufactured.

Rapid Turnaround—In most cases custom designed bore spacers are ready for shipment in 2 to 3 weeks.

Ease of Use—The bore spacers can be equipped with optional casters making the installation process smooth and easy.

The Condux Underbridge Conduit Support Systems & Bore Spacers **Catalog and Design Guide** will provide you with complete information on ordering bore spacers. Call the toll-free number listed at the bottom of this page to order your copy, or visit our web site at www.condux.com.

For immediate assistance, call Condux Customer Service at 1-800-533-2077 with the following information:

- Casing I.D.
- Conduit O.D.
- Number of conduits
- Length of run
- Number of grout holes required
- Diameter of grout holes
- Minimum separation between conduits
- Conduit and grout hole configuration, and if casters will be required
- Quantity required

SINGLE ROLLER CABLE BLOCKS

Single Roller Cable Block

Support a single coaxial, fiber optic or copper cable or aerial innerduct up to 2.75" (70 mm) outside diameter with Condux Single Roller Cable Blocks. A built-in strand lock fits up to $\frac{3}{8}$ " (10 mm) strand to prevent creeping. The lock releases when struck by a Cable Block Pusher ahead of a Cable Lasher. Frames are durable cast aluminum. Rollers are constructed from cast aluminum.

See page 7 for replacement roller information.

Part Number	Description	Max Cable OD	Frame Material	Roller Material
18000670	Single roller cable block	2.75" (70 mm)	aluminum	aluminum
18501186	Aluminum Replacement Roller			

Pole Mount Single Roller Cable Block

The Pole Mount Single Roller Cable Block is specially designed for easy mounting and free-rolling required in figure-eight cable construction. Quickly mounts to a 3-bolt strand clamp on a pole and allows pulling from pole to pole. Support a single coaxial, fiber optic or copper cable or aerial innerduct up to 2.75" (70 mm) outside diameter. Steel frame, with plastic rollers.

Pole Mount Single Roller Cable Blocks are equipped with a steel cable retainer to keep the cable or innerduct on the roller, even in low-tension situations.

Max Strand Diameter $\frac{3}{8}$ " (10mm)

See page 7 for replacement roller information.

Part Number	Description	Max Cable OD	Frame Material	Roller Material
18000620	Single roller cable block with cable retainer (plastic)	2.75" (70 mm)	steel	plastic
18501008	Plastic Replacement Roller			

CONDUX

Replacement Rollers

Replacement Rollers available for aerial cable blocks and hangers. Refer to this chart for specifications on roller sizes.

Due to heat generated by poly-blend rope during pulling operations, an aluminum roller should be utilized. With cotton ropes or pull tape, plastic rollers are adequate.

OVERLASH & ECONOMY CABLE BLOCKS

Overlash Cable Block

Supports a single coaxial, fiber optic or copper cable up to 3.75" (95.3mm) diameter. A built-in strand lock fits up to .5" (12.7mm) strand to prevent creeping during installation. Both the frame and roller are manufactured from high quality, durable cast aluminum.

Cast Aluminum Frame:

- Can be placed on a 4" (102mm) bundle or bare strand .25" - .50" (6.35mm-12.7mm)
- Unidirectional strand lock
- Dual retaining gate system

Cast Aluminum Roller:

- Will support a single cable up to and including 3.75" (95.3mm)

Weight:

- 4.75 lbs (2.15kg)

Part Number	Description	Max Cable OD	Frame Material	Roller Material
18001100	Block, w Cable Retainer	3.75" (95.3 mm)	aluminum	aluminum
18501233	Replacement Roller			aluminum

PRIOR TO ORDERING, ALWAYS KNOW THE FOLLOWING:

- Max Cable O.D. 3.75" (32mm)
- Max Strand O.D. 1/2" (12.7mm)
- Max Bundled O.D. 4" (102mm)

Due to heat generated by poly-blend rope during pulling operations, an aluminum roller should be utilized. With cotton ropes or pull tape, plastic rollers are adequate.

Cable Block 18401060

Economy Cable Block

Condux offers Economy Cable Blocks for support of one cable or innerduct up to 1.25" (32 mm) outside diameter. This block has a built-in strand retention with spring-loaded arm. Frames are durable cast aluminum with steel inserts on strand contact surfaces, and can be used on strands up to $\frac{3}{8}$ " (10 mm) in diameter. Rollers are plastic.

Replacement rollers available. See page 7 for ordering information.

Part Number	Description	Max Cable OD	Frame Material	Roller Material
18401060	Economy cable block, single	1.25" (32 mm)	aluminum	plastic
18501008	Plastic Replacement Roller			

PRIOR TO ORDERING, ALWAYS KNOW THE FOLLOWING:

- Max Cable O.D. 1.25" (32mm)
- Max Strand O.D. 3/8"(10mm)
- Blocks Do Not Lock on Strand

OVERLASH & ECONOMY CABLE BLOCKS

AERIAL TOOLS

Overlash Cable Block

Fit Overlash Cable Blocks over an existing cable bundle up to 2.75" (70 mm) in diameter and support one 1.25" (32 mm) diameter cable or innerduct. Built-in cable retention system allows placement and removal from ground. Frames are durable cast aluminum with steel inserts on strand contact surfaces. Rollers are rubber or aluminum.

Part Number	Description	Maximum Cable Diameter (in)	Frame Material	Roller Material
		(mm)		
18403060	Overlash cable block with 1 single roller	1.25 32	aluminum	rubber
18401180	Overlash cable block with 1 double roller	1.25 32	aluminum	aluminum
18403063	Rubber Replacement Roller			
18403067	Aluminum Replacement Roller			

PRIOR TO ORDERING, ALWAYS KNOW THE FOLLOWING:

- Max Cable O.D. 1.25" (32mm)
- Max Bundled O.D. 2.75" (70mm)
- Blocks Do Not Lock on Strand

Due to heat generated by poly-blend rope during pulling operations, an aluminum roller should be utilized. With cotton ropes or pull tape, plastic rollers are adequate.

Economy Overlash Cable Block

This Economy Overlash Cable Block may be placed over existing cable bundles up to 1.5" (38 mm) in diameter. Single rollers are available in plastic or steel and can accommodate cable or innerduct up to 1.00" (25 mm) diameter. Lightweight zinc-plated steel frame opens and closes for easy installation and ensures cable retention.

Replacement rollers available. See page 7 for ordering information.

Part Number	Description	Maximum Cable Diameter (in)	Roller Material
		(mm)	
18151500	Economy overlash cable block	1.00 25	plastic
18151600	Economy overlash cable block	1.00 25	steel
18501010	Plastic Replacement Roller		
18501043	Steel Replacement Roller		

PRIOR TO ORDERING, ALWAYS KNOW THE FOLLOWING:

- Max Cable O.D. 1" (25mm)
- Max Bundled O.D. 1.5" (38mm)
- Blocks Do Not Lock on Strand

Due to heat generated by poly-blend rope during pulling operations, an aluminum roller should be utilized. With cotton ropes or pull tape, plastic rollers are adequate.

Cable Block 18151500

Cable Block 18151600

90 DEGREE CORNER BLOCKS

90° Corner Blocks

Ensure minimal drag is placed on the cable and that minimum bend radius is not exceeded. Pole-mounted blocks guide cable around an inside or outside corner. Corner blocks are available in 90° configurations with a variety of cable carrying capacities.

For the recommended accessories please see **Corner Blocks Mounting Hardware** (page 11) which includes the **Pole Bracket** and **Pole Bracket Mount Adapter**. Replacement rollers available, page 7.

Due to heat generated by poly-blend rope during pulling operations, an aluminum roller should be utilized. With cotton ropes or pull tape, plastic rollers are adequate.

90° Corner Cable Block 18101930

90° Large Diameter Corner Block

A larger bend radius of 23" (584 mm) makes this block effective for larger diameter cable and innerduct—up to 2.75" (70 mm) diameter. Welded and painted steel frame. Plastic rollers are durable and lightweight.

Mounts on Pole Bracket. Order separately, page 11. Replacement rollers available, page 7.

Part Number	Description	Roller/Cable Config.	Frame Material	Roller Material
18101930	90° corner cable block	1 @ 2.75" (70 mm)	steel	plastic
18101935	90° corner cable block	1 @ 2.75" (70 mm)	steel	aluminum
18501008	Plastic Replacement Roller			
18501186	Aluminum Replacement Roller			

90° Corner Cable Block 18101940

90° Corner Blocks

With a bend radius of 22.25" (565 mm), these corner blocks feature a welded and painted steel frame with angular and vertical reinforcements. Plastic rollers are durable and lightweight. Adjustable rubber idler arms retain cable in position.

Mounts on Pole Bracket. Order separately, page 11. Replacement rollers available, page 7.

Part Number	Description	Roller/Cable Config.	Frame Material	Roller Material
18101940	90° corner cable block	1 @ 1.25" (32 mm)	steel	plastic
18501044	Plastic Replacement Roller			

CORNER BLOCKS MOUNTING HARDWARE

AERIAL TOOLS

Pole Bracket

Use the Pole Bracket for all 90° Corner Blocks. A ratcheting strap design provides easy set-up, while offering a tight fit to the pole. Bracket is steel with a vertical shaft to receive Corner Block. A safety clip is provided to hang unit from strand while installing.

Part Number	Description
18104400	Pole bracket mount with ratcheting strap

Pole Bracket Mount Adapter

Installs easily on the Pole Bracket to provide a horizontal axis to mount 45 Degree Corner Blocks that are to be used as a reel-to-strand chute.

Part Number	Description
18106000	Pole bracket mount adapter (requires Pole Bracket)

"Condux product is heavy duty and built to last. I've been focused on quality for 32 years in our shop. The product won't ship out the door if it's not built correctly."

Clark Fitzloff
Production Coordinator

DUCT RODDERS

Duct Rodders

Condux Duct Rodders combine ease of operation and reliable performance to help increase the efficiency of your rodding operations.

Condux Duct Rodder cages have been designed to be lighter weight for easy handling in the field. They feature sturdy construction and a hand-operated wheel brake. They can be used on their side as well as upright. The 30" (762 mm) and 45" (1,143 mm) cages come with wheels for added mobility. Cage sizes are matched to suit the rod you order.

End Fittings Included

Condux Duct Rodders come equipped with a threaded end fitting on each end, and a tapered head on the outward end. Condux offers a number of optional end fitting accessories for additional applications.

Easy to Order

Simply refer to the charts in this section to determine the diameter of rod you need.

All Duct Rodders come standard with a repair kit.

Duct rodder accessories (pgs. 16 - 19) are available to fit your rodding application.

End fittings are included with Condux duct rodders. See Duct Rodder Accessories for size and part number (pgs 16 - 19).

Condux duct rodders feature sturdy construction and reliable performance.

Hand-operated wheel brake adds control and safety.

CONDUX

DUCT RODDERS

FISHING & RODDING

Two Types of Rod

Each Condux duct rodder has a glass reinforced composite core jacketed in a rugged plastic coating to ensure long life. They have excellent flexural strength, compressive strength, fatigue resistance, and memory. They also have favorable electrical and thermal properties that make them safe for use in cable-occupied duct. They are suitable for pulling back winch line or small diameter cable.

PYTHON®: The Python rod has flexibility and it has a heavy-duty outer plastic coating to resist abrasions and reduce wear. Includes one male and one female end fitting, and a tapered head.

MINI-COBRA®: Condux's Mini-Cobra includes $\frac{3}{16}$ " (5mm) and $\frac{1}{4}$ " (6 mm) diameter rods used primarily for smaller duct sizes and shorter runs. The rod has the same flexibility and strength features of the Python rod and comes wound in 16" (406 mm) and 24" (610 mm) cages in 50' (25 m) to 600' (200 m) lengths. Includes two male end fittings and two tapered heads.

REPLACEMENT ROD: Replacement rod is available for all Condux Duct Rodders. Please contact Condux Customer Service to place your order. Have your existing duct rodder part number ready to ensure an accurate match. Replacement rod comes with end fittings and tapered heads in a disposable replacement cage.

Duct Rodder Replacement

Brake Handles

Use Condux Duct Rodder Replacement Brake Handles to replace missing or damaged handles on existing cages.

Part No.	Description
02218300	16" (406 mm) Duct Rodder Replacement Brake Handle
08081547	24" (610 mm) Duct Rodder Replacement Brake Handle
08081547	30" (762 mm) Duct Rodder Replacement Brake Handle
08081567	45" (1,143 mm) Duct Rodder Replacement Brake Handle

Duct Rodder Replacement Cages

Use Condux Duct Rodder Replacement Cages to update older cages or to replace damaged cages. Fits all major manufacturers' fiberglass rods.

Rod Dia., in (mm)	$\frac{3}{16}$ (5)	$\frac{1}{4}$ (6)	$\frac{5}{16}$ (8)	$\frac{7}{16}$ (11)	$\frac{9}{16}$ (13)
Replacement Cage	08081516R	08081524R	08081530R	08081550R	08081550R

Fiberglass Hand Rods

Screw together fiberglass duct rods for straight runs. All rods equipped with $\frac{3}{4}$ "-10 end fittings. 2,500 lbs. (11,120 N) pull rating.

Part Number	Size (in x ft)	Size (mm x m)
08032026	$\frac{5}{8}$ x 5	16 x 1.5
08032022	$\frac{5}{8}$ x 10	16 x 3

Replacement Hand Rod End Fittings

Part Number	Size/Type in (mm)
08036157	$\frac{3}{4}$ "-10 male end for $\frac{5}{8}$ " (16 mm) rod
08036156	$\frac{3}{4}$ "-10 female end for $\frac{5}{8}$ " (16 mm) rod
08035851	Epoxy Resin, Single Pack

! ORDER CAREFULLY
This item is made-to-order
and is not returnable.

LOW PRESSURE SEAL-OFFS

Conduit Seal-Offs

Conduit Seal-Offs utilize compressed air (up to 15 psi) to force Line Carriers, Cable Chutes or other projectiles (see page 24-25) thru the duct system while dragging a pull string or pull tape (page 30). Once the tape or string is installed, pulling rope (see page 31) or steel cable can be pulled back. In the case of small conductors or fiber cables, it's possible that the string or tape will handle the job. For your compressor needs, see page 132.

Create your Seal-Off Kit: **1 + 2 + 3**

Universal Seal-Off Control Valve

The Seal-Off Control Valve Body combines with an Innerduct Seal-Off, Single Conduit Seal-Off or Double Conduit Seal-Off and recommended Air Gauge Adapter to form a complete Seal-Off Assembly. The interchangeable attachments provide flexibility by allowing the purchase of a single valve body that can be used in a variety of applications depending on conduit size. The Seal-Off Control Valve Body comes standard with an air valve to regulate flow, a standard claw type air fitting and a 3/16" (5mm) Rope Adapter.

Part Number	Description
08032165	Seal-Off control valve body

Individual Innerduct Seal-Offs

The Innerduct Seal-Offs fit the Seal-Off Control Body and thread into Innerduct. See available sizes below.

Part Number	Description	Nominal Duct Size (in) (mm)	Innerduct I.D. Range (in) (mm)
08034321	3/4" Innerduct Seal-Off	3/4 19	.72-.94 19-24

2

15PSI MAX PRESSURE

Air Gauge Adapter

The Air Gauge Adapter allows the monitoring of pressures reached when using a Seal-Off Assembly. While optional, it's highly recommended to avoid exceeding the 15 PSI maximum.

Part Number	Description
08032175	Air Gauge Adapter

3

Rope Adapter Kit

The interchangeable Rope Adapters for the Seal-Off Control Body allow larger strings and tapes to be utilized while minimizing back pressure air loss. Individual adapters are available in 3/16" (5mm), 1/4" (6mm) and 3/8" (10mm) or they can be purchased as a kit – one of each.

Part Number	Description
08032181	Adapter Kit for Conduit Seal-Offs
08032190	3/16" (5 mm) Rope Adapter

Replacement Handle for Single & Double Seal-Offs

The Replacement Handle allows the repair of Seal-Offs where the wing nut has broken or is missing. The handle fits both Single and Double Seal-Offs.

Part No.	Description
08032179	Replacement Handle for Single and Double Seal-Offs

POWER DART® BLOWER

FISHING & RODDING

Power Dart® Blower

The Power Dart Blower provides a method to install Pull String or Pull Tape into longer duct runs without the need for an air compressor. Utilizing three independent, high volume blower motors, this unit delivers 300 CFM (8.5 m³/min) @ 3 PSI (.2 Bar) – more than enough to blow 1/2" (12.7mm) pull string or pull tape 2000' (610m) into conduit up to 6" (152mm) in diameter. By running one, two or all three motors, the operator can regulate the speed of the installation. The Condux® Power Dart® Blower weighs only 31lbs (14kg) making it a breeze to carry from install to install.

*Requires 110V/220V AC Power or 3,000 Watt Generator. Comes w/30 Amp Twist Plug Installed.

Base Part No.	Description
08030003	110V Power Dart Blower (Includes: 110V Power Dart Blower Unit, Hose, Seal-Off Handle & Seal-Offs for 1/2" - 6" (13 mm-152 mm) conduit Carriers not included.)
08030004	220V/240V Power Dart Blower (Includes: 220V/240V Power Dart Blower Unit, Hose, Seal-Off Handle & Seal-Offs for 1/2" - 6" (13 mm-152 mm) conduit Carriers not included.)
08030060	Power Dart Blower Accessory Bag Convenient, canvas bag holds Power Dart hose. Inner bag holds Line Carriers, Foam Carriers, Seal-Off Body and Seal-Offs.

Cable Chute Advantages

- No damage to cable or conduit
- Eliminates need for duct rodding
- Durable and flexible
- Quick and easy installation
- Cost effective

Cable Chute Line Carriers

Condux Cable Chute Line Carriers are designed to pass through conduit without damaging the conduit or existing cable. To use a Cable Chute Line Carrier, tie a line to a Chute, insert the Chute into the Conduit or duct, and blow compressed air propelling the Chute to the end of the duct.

All Cable Chute Line Carriers are made with the highest quality fabrics (nylon or leather) and attention to detail. All products are hand made and go through a series of quality checks prior to being shipped out.

WINCH LINE BLOWER

The Condux Winch Line Blower

The Condux Winch Line Blower is a tool for installing winch line, rope or pull tape into conduit. It turns the job of placing winch line into one easy step, eliminating the need to blow a string and pull back a rope.

Using compressed air, 90 psi (6.2 bar) and 100 cfm (2.8 cmm), the winch line blower can propel steel winch line, rope or tape in conduit from 1" to 6" (25 mm - 152 mm) in diameter.

Installation is easy. No special tools are required. See steps called out on page 27.

WINCH LINE BLOWER

PULLING TAPE INSTALLATION AS AN OVERLAY

Change the Rope Plug on the Winchline Body to the Rope Adapter.

Thread pulling tape through the Rope Adapter.

WINCH LINE & ROPE INSTALLATION

Attach winch line or rope to carrier.

Attach cable chute line carrier (pg 26) to Pull Tape.

Install carrier into duct.

Install cable chute line carrier into duct.

Close adapter around the winch line or rope. Install into duct.

Close adapter around the pulling tape and existing cable. Install into duct.

Install Winch Line Body and tighten the clamp.

Attach body to the adapter. Close and tighten, running existing cable out of the back.

POLY LINE PAIL/MEASURING & PULL TAPE

Poly Line Pail

Line attaches to the back of a foam carrier, inflatable carrier or line carrier and is used to pull back a rope. Packaged in a weather-proof, reusable plastic bucket with lid.

Part Number	Break Strength (lbs) (N)	Length (ft) (m)
08561285*	200 890	6,500 1,981
08561297*	450 2,002	2,500 762

*Pallet quantities of 48 available.

Poly Line Replacement String

Replacement string refills.

Part Number	Break Strength (lbs) (N)	Length (ft) (m)
08561284*	200 890	6,500 1,981
08561299*	450 2,002	2,500 762

*Pallet quantities of 80 available.

Conduit Measuring & Pull Tape, Polyester

For pulling fiber optic or coaxial cable through innerduct or for determining exact wall-to-wall measurements in duct runs. Other strengths and lengths are available.

Part Number	Break Strength (lbs) (N)	Approx Width (in) (mm)	Length (ft) (m)
08073900*	130 578	3/16 5	3,000 914

*Pallet quantities of 48 available.

Polyester Woven Pre-Lubed Tape

Recommended pulling tape for fiber optic and coaxial cable pulling. Pre-lubricated tape provides a low coefficient of friction for easier cable pulling. Flat design distributes the side-wall load and reduces duct burn-through. Marked with accurate sequential footage markings.

Part Number	Break Strength (lbs) (N)	Approx Width (in) (mm)	Length (ft) (m)
08096203	400 1,779	1/4 6	3,000 915
08096503	600 2,669	3/8 10	3,000 915
08075003	1,250 5,560	1/2 13	3,000 915
08075103	1,800 8,006	5/8 16	3,000 915
08096303	2,500 11,120	3/4 19	3,000 915

PULLING ROPE & PULLING TAPE/STANDS

FISHING & RODDING

Polyester Pull Tape Pail

Designed for better mobility and faster deployment, pulling tape in a pail allows for moving from install to install without the hassle of carrying a tape stand.

Part Number	Break Strength (lbs)	Break Strength (N)	Approx Width (in)	Approx Width (mm)	Length (ft)	Length (m)
08096001	400	1,779	1/4	6	4,500	1,372
08096003	1,800	8,006	5/8	16	1,300	396

Double-Braided Cable Pulling Rope

Premium quality rope recommended for cable pulling. Complete with spliced eye on each end. Double-braided construction offers high working loads and tensile strength without kinking. Other sizes available. Contact factory for additional rope specifications.

Part Number	Diameter (in)	Diameter (mm)	Length (ft)	Length (m)	Standard Tensile (lbs)	Standard Tensile (N)	Recommended Working Load (5:1) (lbs)	Recommended Working Load (5:1) (N)
08091003	0.50	13	300	91	10,400	46,262	1,760	7,829

08091112	0.88	22	1,200	366	29,900	133,002	5,080	22,597

! Other lengths and sizes available upon request.

Pulling Tape

A flat woven replacement for $\frac{1}{4}$ " polypropylene rope that provides a lower coefficient of friction due to its flat woven design. Drastically reduces the chance of burn through that is associated with ropes, and has an elongation of less than 10% compared to Polypropylene rope which is 25%+. Not available printed. Other lengths available.

Part Number	Break Strength (lbs)	Break Strength (N)	Approx. Width (in)	Approx. Width (mm)	Length (ft)	Length (m)

08079500	8 203	11.25 286	7.75 197

*2,000 lbs. (8,896 N) load capacity.

When using the flexible steel mandrel there is the potential for duct shaving to occur.

FISHING & RODDING

BALL BEARING SWIVELS

808 Champion Swivels

!
Not designed to be pulled
around bullwheels or
sheaves.

Designed specifically for underground and overhead cable pulling applications. Can handle all types of utility cables. Precision machined from high-strength stainless steel. Clevis pin is easily replaceable (see ordering information below).

CAUTION: 808 Champion Swivels are to be used for cable stringing or pulling only. 808 Champion Swivels are not to be used for directional drilling.

NOTE: Swivels are not designed to run around bullwheels. Always verify that the swivel size is sized to the pulling harness or grip prior to ordering.

Not Designed for Directional Drilling.

Rope to Rope/Grip Clevis

Versatile clevis provides efficient link for several applications. Stainless steel construction with 10,000 lbs. (44,480 N) load capacity. Combinations of sheaves and pins allow the following connections:

- 7/8" (22 mm) diameter rope to 7/8" (22 mm) diameter rope
- Rope to forged eye pulling grip
- Forged eye pulling grip to forged eye pulling grip
- Rope to flexible eye pulling grip

BREAK-AWAY SWIVELS

U. S. Patent No. 4,687,365.

The 10% break tolerance zone for pins used in 5/8" (16mm) and 7/8" (22mm) diameter break-away swivels is + / - 5% of the nominal break load, called out along with the swivel diameter, in the description of the pin. For pins used in 1-1/4" (32mm) diameter or larger break away swivels, this zone shifts to +8% / -2%

NOTE: Swivels are not designed to run around bullwheels.

Break-Away Swivel

Essential for fiber optic and coaxial cable pulling, these swivels have a break load ranging from 150–1,800 pounds (667–8,006 N) and are designed to separate at $\pm 5\%$ of their rated break load. If the load rating is exceeded, the interior break pin fractures, the swivel separates, and the cable remains undamaged. Break pin is easily replaceable (see ordering information, next page).

Break-Away Swivel Dimensions

PULLING ACCESSORIES

Threaded Chain Connectors

Offers a quick and easy way to connect pulling eyes or swivels to winch lines, harnesses or rope. To close, simply screw the nut onto the threaded end. Connectors are reusable.

Note: To be used for cable stringing or pulling only.

DIRECTIONAL DRILLING SWIVELS

819 D.Drill Directional Drilling Swivels

Designed specifically for directional drilling, the Condux 819 D.Drill Swivels prevent boring equipments' rotational torque from interfering with the product (cable or conduit) being pulled. The D.Drill Swivels are greasable and double sealed to keep contaminants out. Clevis pins with hex nuts allow for installation and removal from either side of the swivel. Condux Directional Drilling Swivels feature a 90 day warranty.

CAUTION: To be used for directional drilling only.

CAUTION: Condux requires the use of a calcium based lubricant only. Other lubricants may have adverse reactions when exposed to bentonite products. Condux requires that the swivels be greased after each use to purge any contaminants that may have penetrated past the seals into the swivel while boring. See page 43 for calcium based lubricants.

U.S. Patent No. 5,607,248.

400 D.Drill® Directional Drilling Swivels

Designed specifically for directional drilling, the Condux 400 D.Drill Swivels prevent boring equipments' rotational torque from interfering with the product (cable or conduit) being pulled. The D.Drill Swivels are greasable and double sealed to keep contaminants out. Condux Directional Drilling Swivels feature a 90 day warranty.

CAUTION: To be used for directional drilling and underground cable installation only.

CAUTION: Condux requires the use of a calcium based lubricant only. Other lubricants may have adverse reactions when exposed to bentonite products. Condux requires that the swivels be greased after each use to purge any contaminants that may have penetrated past the seals into the swivel while boring.

D.Drill® Grease

Specially formulated for use in a bentonite clay environment. This is an extreme pressure multiservice lubricant designed to give outstanding performance in directional drilling/boring applications. Manufactured from the highest quality petroleum oil and thickened with a unique calcium complex soap. This thickener resists breakdown caused by bentonite, which is common with lithium based lubricants. Packaged in cartridges to fit a standard grease gun.

DIRECTIONAL DRILLING SWIVELS

Break-Away Swivels for Directional Drilling

Avoid overstressing cable or conduit being pulled in during directional drilling operations. The Condux Break-Away Swivels for directional drilling are designed exclusively to provide **both** the swivel and the break link for product pull-back. Eliminate the use of two or more components and shorten the gap between the reamer and pulling eye. No need to use "weak link" pipe sections or wire when using the Condux Break-Away Swivel.

Seven different diameter swivels are available to accommodate various pulling needs. Break loads range from 1,200 lbs. (5,338 N) to 40,000 lbs. (111,250 N) and are designed to separate at +8/-2% of their rated break load. Order Replacement Pins as needed.

NOTE: D.Drill Swivels come with a 90 day limited warranty.

Condux Break-Away D.Drill® Swivels are designed for use when directional drilling; however, they may be used in other applications where the swivel, product and pulling medium are segregated from personnel and a break would remain contained (a pipe or bore hole).

WARNING: Use in any manner other than that described above could result in severe personal injury or death.

CONDUX

DIRECTIONAL DRILLING SWIVELS

SWIVELS & ACCESSORIES

7/8" (22mm) Break-Away Swivel for Directional Drilling

Avoid overstressing cable or conduit being pulled in during directional drilling operations. The Condux 7/8" (22mm) Break-Away Swivel for directional drilling is designed exclusively to provide **both** the swivel and the break link for product pull-back. Eliminate the use of two or more components and shorten the gap between the reamer and pulling eye. No need to use "weak link" pipe sections or wire when using the 7/8" (22mm) Condux Break-Away Swivel.

This swivel is available to accommodate various pulling needs. Break loads range from 150 lbs. (667 N) to 1,800 lbs. (8,006 N) and are designed to separate at $\pm 5\%$ of their rated break load. Order Replacement Pins as needed.

NOTE: D.Drill Swivels come with a 90 day limited warranty.

*WARNING: This swivel is to be used while Directional Drilling only— Severe personal injury could result if used with rope or steel winch lines in cable pulling applications.

PULLING GRIPS

Pulling Grips

Pulling Grips offer excellent means of pulling electrical cable, bare conductors, copper telephone cable or rope through conduit. Grips are made of high-quality galvanized steel strand to assure long life. Under normal conditions, the grips should be used with a safety factor of five, but this will vary depending on the situation. The tension, diameter, movement, number of objects gripped, gripping surface and the attachments used are some of the variables affecting the safety factor. In addition, the effects of abrasion, corrosion, prior use or misuse must be considered and the grip replaced when necessary. The safety factor is ultimately determined by the user.

Fiber Optic Pulling Grips are also available. They feature a special weave that provides positive holding power while allowing the grip to remain flexible, ensuring cable protection.

Additional sizes & support grips are available, please contact Condux Customer Service for assistance.

CONDUX

PULLING GRIPS

PULLING EYES & ACCESSORIES

Select The Correct Grip

Each grip is designed to work on a specific range of cable diameters.

Step 1: Determine your cable outside diameter.

Step 2: Find the grip size that encompasses your cable diameter.

Step 3: Whenever possible, use a closed mesh that assembles over the cable end. If the cable end is not available, use a split mesh.

Step 4: Where available, select an eye style that suits your needs.

Step 5: Estimate the tension to be put on the grip, establish the working load you require and compare this to the listed approximate breaking strength of the grip to ensure that the grip will be strong enough.

ORDER CAREFULLY
This item is made-to-order
and is not returnable.

CONDUX

Junior Grip

E=Eye length

M=Mesh length at nominal diameter.

PULLING GRIPS

Junior Pulling Grips feature a strong galvanized steel, single weave mesh. A flexible eye easily attaches to a pulling line, snake or fish tape. Designed to pull building wire, Junior grips are safe tools to use in pulling wire at low tension through conduit during electrical construction.

Part Number 08643200

Light Duty Grip - Short

E=Eye length

M=Mesh length at nominal diameter.

Light Duty Pulling Grips are made of galvanized steel in a single weave construction. They feature a flexible eye for easy attachment to a pulling line. Light duty grips are used in general underground electrical construction where pulling tensions are low. They are easy tools to use in wiring industrial plants and commercial buildings.

PULLING GRIPS

ORDER CAREFULLY
This item is made-to-order
and is not returnable

T-Type Grips - Short, Flexible Eye

E=Eye length

M=Mesh length at nominal diameter.

Flexible T-Type Pulling Grips are made of high strength galvanized steel strand. They feature double weave mesh for positive holding power in medium to heavy pulling jobs. The grip eye will easily attach to a swivel. They are used for the installation of underground power cables, communication lines and service lines into factories, construction projects and for general underground electrical construction. Available in two mesh lengths, short for medium pulls, and standard for general purpose pulling.

K-Type Grips* - Short, Forged Eye

E=Eye length

M=Mesh length at nominal diameter.

Rotating Eye, K-Type Pulling Grips are made of high strength galvanized steel strand. All grips feature double weave mesh for greater strength and added mesh contact on the cable, to handle longer or heavier pulling jobs. The forged eye mates easily with a swivel or shackle. They are specially designed for use in the installation of underground power cables, communication lines and service lines into factories, shopping centers, construction projects and general underground electrical construction.

PULLING GRIPS

Multiple Strength Grip - Rotating Eye*

Multiple Strength Pulling Grips are designed for pulling ACSR, aluminum or copper bare conductor, ground wires, messenger strands, wire rope and insulated cables. They are ideal for overhead transmission and distribution line stringing where moderate loading is anticipated. They are economical tools used for attaching conductors to pulling lines and double socking for conductor-to-conductor connections.

*Rotating Eye is not a swivel. It will not turn while under tension, but it can turn to relieve pulling torque when the tension is relaxed.

Multiple Strength Grip - Flexible Eye

Multiple Strength Pulling Grips are designed for pulling ACSR, aluminum or copper bare conductor, ground wires, messenger strands, wire rope and insulated cables. They are ideal for overhead transmission and distribution line stringing where moderate loading is anticipated. They are economical tools used for attaching conductors to pulling lines and double socking for conductor-to-conductor connections.

PULLING GRIPS

ORDER CAREFULLY
This item is made-to-order
and is not returnable

Dua-Pull® Grips**

E=Eye length

M=Mesh length at nominal diameter.

Dua-Pull Pulling Grips are the highest strength pulling grips manufactured for overhead transmission line stringing applications. They are most commonly used for attaching pulling lines to conductors, conductors to running boards and double socking for conductor-to-conductor connections. They accommodate ACSR, ACAR, all aluminum and copper conductors, ground wires messenger strands and synthetic ropes not provided by any other grip.

Dua-Pull Feed Tube

The Feed Tube is used when assembling synthetic rope into the Dua-Pull Grip. It is required on the two largest sizes of Dua-Pull Grips. Feed Tubes are available for use on all sizes of Dua-Pull Grips.

Non-Conductive Grip

E=Eye length

M=Mesh length at nominal diameter.

Non-Conductive Pulling Grips are made of a high strength, non-conductive aramid fiber, and are available for pulling single cable or cable bundles. Their braided double weave design adds strength and positive holding power. They were developed for use by utilities for pulling overhead distribution lines in close proximity to energized lines and hardware.

PULLING GRIPS

Slack Grip - Closed Mesh

Slack Grip - Closed Mesh Pulling Grips are made of high strength galvanized steel in a double weave construction with a single eye. The closed mesh style grip is used when the cable end is accessible. All grips feature a single offset eye for easy attachment to a pulling line. They are used to pull in slack for final placement of underground cable after it has been pulled in. They are also used for removing cable.

Slack Grip - Split Mesh, Lace Closing

Slack Grip - Split Mesh, Lace Closing Pulling Grips are made of high strength galvanized steel in a double weave construction with a single eye. The split lace closing style grip is used when the cable end is not accessible. All grips feature a single offset eye for easy attachment to a pulling line. They are used to pull in slack for final placement of underground cable after it has been pulled in. They are also used for removing cable. Standard mesh lengths are generally used in restricted space for short pulls. Longer lengths are used for higher pulling loads where space is not restricted.

PE & PVC PULLING EYES

PE & PVC Pulling Eyes

The Condux PE & PVC Pulling Eyes feature three designs to suit your needs.

The non-sleeved design provides optimum gripping power, an extremely rigid center rod to prevent bending, and a steel tapered lead cone with the same O.D. as the conduit. The sleeved version are water tight eyes that feature a multiple O-Ring configuration. These also have an extremely rigid center rod and sleeves designed to protect the outer leading edge of the conduit to form a water tight seal. Both designs feature split gripping segments with aggressive gripping threads, coupled with a steel expansion plug that better grips the full range of conduit I.D.s.

Installation of the PE & PVC Pulling Eyes simply requires the leading eye to be tightened. The pulling eyes come standard with attachment eyes at both ends for connecting rope or steel lines. Pull-out strengths generally exceed the tensile capacity of the conduit.

NOTE: PE & PVC Pulling Eyes come with a 90 day limited warranty.

Replacement O-Rings on page 57.

INNERDUCT PULLING PRODUCTS

PULLING EYES & ACCESSORIES

Swivel Head Innerduct Pulling Eye

The Innerduct Pulling Eye is a hybrid tool that combines features from standard innerduct pulling eyes and Condux swivels. A swivel head prevents twisting and binding of the innerduct as it is installed. It eliminates the need for a separate swivel on each pulling eye when installing single innerducts into individual conduits or multiple innerducts into a single conduit. Its short length is an advantage on tight bends compared to using a separate swivel and pulling eye. Easily installed using a 1 $\frac{3}{8}$ " deep socket or adjustable wrench.

NOTE: To determine correct pulling eye size, obtain the actual innerduct inside diameter (I.D.). The I.D. measurement must be greater than dimension A and smaller than dimension B.

Replacement Clevis Pins for Swivel Head Innerduct Pulling Eyes

Part Number	Replacement Part Number
08960712	08081036
08960715	08081036
08960720	08081036

See compatibility chart on page 61 to determine what Innerduct Pulling Eyes work with the different size Innerduct Ranges, Innerduct SDR Ratings, Swivels, Pulling Harnesses and Threaded Chain Connectors.

* Will fit all Condux pulling harnesses.

INNERDUCT PULLING PRODUCTS

Clevis Head Innerduct Pulling Eye

Same tapered threads as the standard innerduct pulling eye, these pulling eyes feature a slotted head with clevis pin to permit direct attachment to any Condux multiple pulling harness leg ends. When properly sized and installed, these eyes will not pull out of the innerduct until the pulling tensions have greatly exceeded the maximum pulling tensions recommended by the innerduct manufacturers.

NOTE: To determine correct pulling eye size, obtain the actual innerduct inside diameter (I.D.). The I.D. measurement must be greater than dimension A and smaller than dimension B.

* Will fit all Condux pulling harnesses.

**Will fit the Condux $\frac{3}{8}$ " and $\frac{1}{2}$ " cable pulling harnesses.

INNERDUCT PULLING PRODUCTS

See compatibility chart on page 61 to determine what Innerduct Pulling Eyes work with the different size Innerduct Ranges, Innerduct SDR Ratings, Swivels, Pulling Harnesses and Threaded Chain Connectors.

Fixed Head Innerduct Pulling Eye

Tapered buttress threads thread into the innerduct for maximum pulling strength. These eyes connect directly to a Condux swivel (see page 34). When properly sized and installed, these eyes will not pull out of the innerduct until the pulling tensions have greatly exceeded the maximum pulling tensions recommended by the innerduct manufacturers.

NOTE: To determine correct pulling eye size, obtain the actual innerduct inside diameter (I.D.). The I.D. measurement must be greater than dimension A and smaller than dimension B.

08914010	1 Inch CTS Gas Pipe Pulley	.813"-1.05" (21mm-27mm)

PULLING EYES & ACCESSORIES

PULLING EYE SYSTEMS

PULLING EYES & ACCESSORIES

Reusable Power Cable Pulling Eyes

Condux non-crimp Reusable Cable Pulling Eyes waste virtually no cable and all components are completely reusable. These eyes will remain firmly secured on the cable for a confident pull. No special tools or crimpers are required for installation.

Three designs of Reusable Power Pulling Eyes are available: Clevis Head, Standard Head, and Swivel Head.

For ease of ordering and cost savings, kits are available for Clevis, Swivel and Standard Head Reusable Eyes. See page 64 for information.

Eye Socket Plug Sleeve Nut

Reusable Power Pulling Eyes, Clevis Head

The Clevis Head Power Pulling Eyes feature a slotted head with clevis pin to allow direct attachment to the Condux multiple pulling harness. When pulling multiple cables into a single conduit, the conductors can be attached to a harness and installation is simplified to a single pull of one assembly. Each Clevis Head Power Pulling Eye includes a clevis socket, sleeve nut, and plug.

+ - Will fit $\frac{3}{8}$ " (9.5 mm) and $\frac{1}{2}$ " (13 mm) cable pulling harnesses.

* - Will fit all Condux pulling harnesses.

** - Will fit the $\frac{1}{8}$ " (3 mm) and $\frac{1}{4}$ " (6 mm) cable pulling harnesses.

Will not work on flat aluminum stranded conductor.

PULLING EYE SYSTEMS

Reusable Power Pulling Eyes, Standard Head

The Standard Head Power Pulling Eyes are an excellent alternative when pulling multiple cables into a single conduit. Single conductors can be attached to a Condux Multiple Pulling Harness with links or with Condux swivels. Installation is then simplified to a single pull of one assembly. Each Standard Power Pulling Eye includes an eye socket, sleeve nut, and plug.

3:1 Safety Factor

Will not work on flat aluminum stranded conductor.

PULLING EYE SYSTEMS

PULLING EYES & ACCESSORIES

Reusable Power Pulling Eyes, Swivel Head

The Swivel Head Power Pulling Eye is a hybrid tool that combines features from standard reusable power pulling eyes and Condux swivels for superior performance. A swivel head prevents twisting and binding of the cable as it is installed. It eliminates the need for a separate swivel on each pulling eye when installing single cables into individual conduits or multiple cables into a single conduit. Each Swivel Head Power Pulling Eye includes a swivel head, sleeve nut, and plug.

* - Will fit all Condux pulling harnesses.

** - Will fit the $\frac{1}{8}$ " (3 mm) and $\frac{1}{4}$ " (6 mm) cable pulling harnesses.

Will not work on flat aluminum stranded conductor.

Reusable Power Pulling Eye Kits

For cost savings and ease of ordering, Condux has prepared kits for the Clevis, Standard, and Swivel Head Reusable Power Pulling Eyes.

Clevis Head Kits

Part Number	Description
08917010	Kit for 350 to 1000 kcmil power pulling eyes with clevis ends. Includes 3 each of the eyes for 350 to 1000 kcmil cable. NOTE: Does not include 400 or 600kcmil.
08917060	Kit for 1/0 AWG to 250 kcmil power pulling eyes with clevis ends. Includes three each of the eyes for 1/0 AWG to 250 kcmil cable.

Standard Head Kits

Part Number	Description
08918595	Kit for 350 to 1000 kcmil power pulling eyes with eye ends. Includes three each of the eyes for 350 to 1000 kcmil cable. NOTE: Does not include 400 or 600kcmil.
08918590	Kit for 1/0 AWG to 250 kcmil power pulling eyes with eye ends. Includes three each of the eyes for 1/0 AWG to 250 kcmil cable.

Swivel Head Kits

Part Number	Description
08917030	Kit for 350 to 1000 kcmil power pulling eyes with swivel ends. Includes three each of the eyes for 350 to 1000 kcmil cable. NOTE: Does not include 400 or 600kcmil.
08917080	Kit for 1/0 AWG to 250 kcmil power pulling eyes with swivel ends. Includes three each of the eyes for 1/0 AWG to 250 kcmil cable.

Replacement Case

Part Number	Description
08917086	Replacement case is available for the Reusable Power Pulling Eyes. This case includes a foam insert for the storage of the power pulling eyes.

CONDUX

CABLE PULLING LUBRICANT

Crimp-On Cable Pulling Eyes and Accessories

Condux Crimp-On Cable Pulling Eyes for telephone and power cable are the ultimate solution in cable pulling eyes. These pulling eyes form a connection as strong as the cable itself. The entire cable, jacket and conductor is used which reduces the risk of cable deformation during pulling. When properly installed, Crimp-On Pulling Eyes are virtually impossible to pull off and also seal the cable against both water and air intrusion. Typically factory installed, the pulling eyes can also be field installed with a special crimping tool, available from Condux.

The Condux Crimp-On Cable Pulling Eyes Catalog lists complete information on different styles of pulling eyes available and serves as an ordering guide. It is available through Condux Customer Service or from your local manufacturer's representative. Call Condux at the numbers listed on the bottom of this page to order the Condux Crimp-On Cable Pulling Eyes Catalog.

Request Product Literature from Customer Service.

Crimp-on Pulling Eye Crimper Kit and Accessories

Polywater® Lubricant J

Polywater® Lubricant J is a high performance, clean, slow-drying, water-based gel. Lubricant J provides maximum tension reduction in all types of cable pulling. It is especially recommended for long pulls, multiple-bend pulls and pulls in hot environments. Lubricant J dries to form a thin lubricating film that retains its slipperiness for months after use. It is harmless to humans, environmentally safe, compatible with all cable jacket materials and easily applied.

Part Number	Description	Std. Pkg. Qty.
08230300	1 Quart (.9 liter) Squeeze Bottle	12/case
08230310	1/2 Gallon (1.9 liter) Poly Bag (in Pail)	10/pail
08230301	1 Gallon (3.8 liter) Jug	4/case
08230305	5 Gallon (19 liter) Pourable Pail	1
08230355	55 Gallon (208 liter) Drum	1

Polywater® Lubricant WJ

Lubricant WJ is a non-freezing form of the standard Lubricant J for power applications .

Part Number	Description	Std. Pkg. Qty.
08230400	1 Quart (.9 liter) Squeeze Bottle	12/case
08230410	1/2 Gallon (1.9 liter) Poly Bag (in Pail)	10/pail
08230401	1 Gallon (3.8 liter) Jug	4/case
08230405	5 Gallon (19 liter) Pourable Pail	1
08230455	55 Gallon (208 liter) Drum	1

Polywater® Lubricant PJ

Polywater® Lubricant PJ is a pourable version of the Polywater® Lubricant J. It offers the same proven features as Polywater® Lubricant J in key areas such as lubricity, cable compatibility and easy clean-up, yet is easier to apply where pouring is practical.

Part Number	Description	Std. Pkg. Qty.
08230501	1 Gallon (3.8 liter) Jug	4/case
08230504	2½ Gallon (9.5 liter) Jug	2/case
08230505	5 Gallon (19 liter) Pourable Pail	1
08230555	55 Gallon (208 liter) Drum	1

CABLEGLIDER® LW CABLE PULLER

CableGlider® LW

The Condux CableGlider LW offers portability and ease of set-up, one-person operation, in a completely self-contained unit to adapt to a variety of pulling situations. It comes equipped with a one speed motor and gearbox that provides up to 3,000 lbs (13,345 N) of pulling force.

Design features include a pivoting arm, split conduit adapters and a foot switch for operator convenience and safety, it is recommended that the CableGlider LW be used with 3/8" - 1/2" (9.5mm - 12.7mm) diameter rope.

CableGlider LW includes the following items:

- Puller
- Foot switch
- Fork
- Canvas carrying bag

Part Number	Description
08678200	CableGlider LW (Includes: Puller, Foot Switch, Fork & Canvas Bag)

! Adapters sold separately.
See page 68.

Specifications		
PULLING FORCE	lbs	Kn
Maximum	3,000	13
PULLING SPEED	ft/min	m/min
No Load	30	9
Power Requirements		
	115 VAC @ 9 AMPS Min.	
PEAK POWER	.95 HP (.708 KW)	
GENERATOR	3500 Watt Recommended	

1" - 5" Conduit Adapters

Adapters Split for Easy Removal

Retaining Fork

POWER CABLE INSTALLATION

Can be used for Vertical or Horizontal Pulls

CABLEGLIDER® LW ACCESSORIES

CableGlider LW® Tripod

Pull an additional 5' (1.5m) of slack with the Condux LW CableGlider Tripod.

NOTE: LW CableGlider sold separately.

Part No.	Description
08678350	3,000 lb (13,345 N) CG Tripod
08678370	3,000 lb (13,345 N) CG Tripod Retro Kit

Conduit Adapters

Replacement adapters are available, which allow pulling into conduit up to 4" (102 mm). The external adapters are designed to fit the OD of the conduit, while the internal adapters, when used with the external adapters, fit the ID of the conduit. All adapters come split for easy removal.

External Adapters

Part Number	Description
08678240	External Adapter, 1.00" (25 mm) Conduit
08678245	External Adapter, 1.25" (32 mm) Conduit
08678250	External Adapter, 1.50" (38 mm) Conduit
08678255	External Adapter, 2.00" (51 mm) Conduit
08678260	External Adapter, 2.50" (64 mm) Conduit
08678265	External Adapter, 3.00" (76 mm) Conduit
08678270	External Adapter, 3.50" (89 mm) Conduit
08678275	External Adapter, 4.00" (102 mm) Conduit
08678300	External Adapter, 5.00" (127 mm) Conduit
08678330	External Adapter, 6.00" (152 mm) Conduit

Internal Adapters (Requires External Adapters)

Part Number	Description
08678276	Internal Adapter, 1.00" (25 mm) Conduit
08678277	Internal Adapter, 1.25" (32 mm) Conduit
08678278	Internal Adapter, 1.50" (38 mm) Conduit
08678279	Internal Adapter, 2.00" (51 mm) Conduit
08678280	Internal Adapter, 2.50" (64 mm) Conduit
08678281	Internal Adapter, 3.00" (76 mm) Conduit
08678282	Internal Adapter, 3.50" (89 mm) Conduit
08678283	Internal Adapter, 4.00" (102 mm) Conduit
08678303	Internal Adapter, 2.00" (51 mm) Conduit Sch 80
08678304	Internal Adapter, 3.00" (76 mm) Conduit Sch 80
08678305	Internal Adapter, 4.00" (102 mm) Conduit Sch 80
08678306	Internal Adapter, 5.00" (127 mm) Conduit Sch 80
08678324	Internal Adapter, 5.00" (127 mm) Conduit Sch 40
08678329	Internal Adapter, 6.00" (152 mm) Conduit Sch 80

Adapter Kits

Part Number	Description
08678307	External Adapter Kit, 1.00-4.00" (25-127 mm) Conduit
08678320	Internal Adapter Kit, 1.00-4.00" (25-127 mm) Conduit

For cost savings and ease of ordering, Condux has prepared kits for the CableGlider LW Adapters.

CABLEGLIDER® LW ACCESSORIES

Extension Frame

The Extension Frame is ideal for pulling in handholes and pull boxes when added reach is necessary.

Part Number	Description
08678295	Extension Frame LW Puller

LW CableGlider Amp-Type Tensiometer

Monitors pull tension based on the number of amps the motor is drawing. Useful when superior accuracy is not required (Accuracy is $\pm 20\%$) Amp usage is then translated into a tension reading shown on the display.

Part Number	Description
08674110	110 Volt Amp-Type Tensiometer (LW model)

Hitch Mount Adapter LW CableGlider®

Hitch Mount Adapters are a fast, easy way to mount the LW CableGlider. The Hitch Mount Adapter attaches directly into a typical 2" (51 mm) square Reese-type receiver.

Part Number	Description
08678217	LW Hitch Mount Adapter

Floor/Conduit/Pole Mount Frame LW CableGlider®

Makes it possible to attach the CableGlider power pack to the floor, steel conduit, I-beams or a wood pole. Typically used where there is limited access for overhead pulling or pulling from pole risers. Floor mounting requires $\frac{5}{8}$ " or M16 fasteners, grade 5 or better.

NOTE: 24" (610 mm) diameter maximum pole.

WARNING: CableGlider Cable Pullers are not to be used as a hoist or for lifting, supporting or transporting people or loads.

Part Number	Description
08674000	Floor/Conduit/Pole Mount Frame LW CableGlider (Complete Kit)
08674001	Brackets, LW CableGlider
08674005	Floor/Conduit/Pole Mount Frame

Complete Pulling Packages For CableGlider STD

Condux pulling packages offer cost savings and ordering convenience.

Part No. Description

08674388 CableGlider STD (Package 1)

- 110 Volt Puller with accessories
- Standard Extension Frame (pg. 80)
08674940
- 600 ft. (183 m) of 5/8" (16 mm) double-braided rope (pg. 31)
08090906
- Floor/Conduit/Pole Mount Frame (pg. 79)
08674005
- 5" (127 mm) & 6" (152 mm) adapters w/retaining fork (pg. 81)
08610648 (5" adapter), 08610649 (6" adapter), 08674022 (re. fork)
- Running Line Tensiometer with Chart Recorder (pg. 82)
08677350

08674388 CableGlider STD (Package 1) Split

All items listed above included. Split adapter and fork part numbers:
08611008 (5" adapter), 08611009 (6" adapter), 08611013 (re. fork)

08610686 CableGlider STD (Package 2)

All items listed above (Package 1) included.

Amp Type tensiometer (Replaced Running Line Tensiometer) part number:
08674100

08610685 CableGlider STD (Package 2) Split

Amp Type Tensiometer

All items listed above included. Split adapter and fork part numbers:
08611008 (5" adapter), 08611009 (6" adapter), 08611013 (re. fork)

Transformer Volt Converter 4000 Watt

Used only with the STD and Plus CableGliders.

Part Number Description

08674850 Transformer Volt Converter 4000 Watt

Features:

- 4000 Watt
- Heavy-Duty Continuous use Transformer
- One grounded outlet in front of unit (accepts 3 or 2 prong US and Euro Plugs)
- Converts 220/240 Volts down to 110/120 Volts
- Built-In Fuse Protection
- Hard-Wire with European Shucko Plug also good for Asian Outlets

Typical CableGlider STD Applications

HORIZONTAL PULL

HORIZONTAL VAULT PULL

VERTICAL PULL WITH 45° ELBOW

CABLEGLIDER® CABLE PULLERS

CableGlider® Plus Cable Puller

This model comes equipped with the same removable two-speed, 6,500 lbs (28,912 N) power pack and accessories as our STD model, but features a heavy-duty frame with an extra pivoting arm for added performance and versatility. In addition, the front frame height can easily be adjusted with pins. Like all CableGlider models, the Plus is portable, sets up quickly and comes completely self-contained, ready to work.

As with the STD model, the CableGlider Plus features a self-tailing capstan for added stability, a pivoting arm and a foot switch for operator convenience and safety. Accepts all diameters of rope. The capstan accepts $\frac{5}{8}$ " (16 mm) to $\frac{7}{8}$ " (22 mm) rope only.

CableGlider Plus includes the following items:

- Puller
- Foot switch
- Retaining Fork
- Conduit Adapters - 2" (51 mm), 3" (76 mm), 3 $\frac{1}{2}$ " (89 mm), 4" (102 mm)
- Tool box for the accessories

CABLEGLIDER® CABLE PULLERS

CableGlider® HD Cable Puller

The Condux CableGlider HD is specially designed to provide maximum pulling power for longer runs in a completely self-contained unit. It offers fast set-up, portability and is easily adaptable for a variety of pulling situations.

The removable power pack delivers up to 12,000 lbs (53,375 N) of pulling force at low speed—over 80% more than our STD puller. The two-speed motor pulls up to 30 ft/min (9 m/min) at high speed and up to 15 ft/min (4.5 m/min) at low speed.

The CableGlider HD comes with a heavy-duty frame and extra pivoting arm. The front frame height can easily be adjusted with pins.

CableGlider HD includes the following items:

- Puller
- Foot switch
- Retaining Fork
- Conduit Adapters - 2" (51 mm), 3" (76 mm),
3½" (89 mm), 4" (102 mm)
- Tool box for the accessories

CABLEGLIDER® POWER PACKS & ACCESSORIES

Power Packs

As an added measure of versatility and convenience, the Condux CableGlider Power Packs can be purchased separately without the standard base frames provided with the CableGlider Cable Pullers. The power packs provide the same pulling capacities as the CableGlider Cable Pullers (see pages 70 to 75) and can be used on the Floor Mount Frame or the Floor/Conduit/Pole Mount Frames listed on page 79.

WARNING: CableGlider Cable Pullers are not to be used as a hoist or for lifting, supporting or transporting people or loads.

Part Number	Description
08610860	110 Volt STD Cable Puller Power Pack and Foot Control
08610880	110 Volt Plus Cable Puller Power Pack and Foot Control
08674680	110 Volt HD Cable Puller Power Pack and Foot Control
08610900	220/240 Volt STD Cable Puller Power Pack (EU Plug) and Foot Control
08610900-AU	220/240 Volt STD Cable Puller Power Pack (AU Plug) and Foot Control

Adjustable Manhole Adapter

Designed to work with CableGlider Cable Pullers, the Condux Adjustable Manhole Adapter allows greater stability and versatility for manhole pulls. The rugged aluminum frame provides an adjustable platform to fit 18" (450 mm) to 46" (1,168 mm) manholes.

Use the frame to position a cable puller above a manhole. Installation is easy, the fit is secure, and the strength is a maximum 12,000 lbs. (53,376 N).

Part Number	Description
08674750	Adjustable Manhole Adapter (comes standard with 4" plate)
08674752	6" Plate - Required when using 6" retaining fork (page 79)

CABLEGLIDER® ACCESSORIES

POWER CABLE INSTALLATION

Floor Mount Frame

Fastens to the floor of a vault, manhole, or utility room. The power pack pins easily to the frame. Requires $\frac{5}{8}$ " or M16 fasteners, grade 5 or better.

WARNING: CableGlider Cable Pullers are not to be used as a hoist or for lifting, supporting or transporting people or loads.

Part Number	Description
08610620	Floor Mount Frame (STD model)
08674595	Floor Mount Frame (Plus & HD models)

Floor/Conduit/Pole Mount Frame

Makes it possible to attach the power pack to the floor, steel conduit, I-beams or a wood pole. Typically is used where there is limited access for overhead pulling or pulling from pole risers. Floor mounting requires $\frac{5}{8}$ " or M16 fasteners, grade 5 or better.

NOTE: 24" (610 mm) diameter maximum pole.

WARNING: CableGlider Cable Pullers are not to be used as a hoist or for lifting, supporting or transporting people or loads.

Part Number	Description
08674005	Floor/Conduit/Pole Mount Frame (STD model)
08674010	Floor/Conduit/Pole Mount Frame (Plus & HD models)

CABLEGLIDER® ACCESSORIES

Extension Frame Kit for CableGlider STD Model

Extension Frame Kit for CableGlider Plus & HD Models

Center Joint

Duct End Joint

Cable Puller Adapter

Extension Frame

Productivity reaches a new level with the Condux CableGlider® Cable Puller Extension Frame. Using only a few modular components, difficult pulling situations can have easy solutions.

Ideal for cable pulling in deep manholes where added reach is necessary. Also, high overhead ducts can be reached without compromising the stability of the cable puller.

Pull slack with the Extension Frame when extra reach is not needed. It actually adds length to the conduit run, allowing the cable puller to be positioned further back and more cable (slack) to be pulled through.

Extension Frames are available in kits that configure to Condux CableGlider Standard, Plus, and Heavy Duty Cable Pullers. Each kit contains:

- Cable Puller Adapter
- Center Joint
- Duct End Joint

Steel duct (2" Sch 40 GRC) not included.

Extension Frame Kits

Part Number	Description
08674940	Kit for CableGlider STD model
08674960	Kit for CableGlider Plus and HD models

08674901	Duct End Joint for CableGlider STD, Plus and HD models

CABLEGLIDER® ACCESSORIES

Conduit Adapters

Additional adapters are available which allow pulling into conduit up to 6" (152 mm) in size. The 5" (127 mm) and 6" (152 mm) adapters require the use of an optional retaining fork.

Adapters for 2" (51 mm), 3" (76 mm), 3½" (89 mm), 4" (102 mm) conduit are included in a tool box that comes standard with all cable pullers. Order additional adapters separately below, or order a complete toolbox.

Straight Adapters

Part Number	Duct Size (in) (mm)	Part Number	Duct Size (in) (mm)
08610642	1¼ 32	08610645*	3½ 89

Tensiometer
for STD & Plus Models

RUNNING LINE TENSIOMETER

Running Line Tensiometer

The Condux Running Line Tensiometer, used with the Condux CableGlider® Cable Pullers will give accurate measurements of the force exerted on a cable as it is installed. It consists of two components: Mechanical Sensing Unit (which mounts directly to the cable puller) and the Electronic Control Box.

The unit will accommodate pull tape and rope up to and including $\frac{7}{8}$ " diameter with an accuracy of $\pm 5\%$ of full scale. Load handling capabilities and other specifications are determined by the model used.

Mechanical Sensing Unit

Mounts easily to the cable puller frame with a mounting bracket and pin. The Condux Running Line Tensiometer's Mechanical Sensing Unit permits rope installation without disassembly of the unit.

Electronic Control Box

Features large LED Display and Paperless Recorder with trend display. Paperless Recorder includes: Trend Display, CompactFlash™ card slot with 64MB Flash Card, and USB interface. A programmable overload set point has both an audible and visual indication of an overload condition. The Electronic Control Box also has the capability to disengage the cable puller if an overload occurs.

Running Line Tensiometer, CableGlider STD

Measures loads of 0 to 6,500 lbs. (0 to 28,912 N) with an accuracy of ± 325 lbs. (1,446 N).

Units comes standard with the following:

- Mechanical Sensing Unit
- ECB with these standard features:
 - Large LED readout
 - Paperless recorder with Trend Display,
Compact Flash Drive™ with 64MB Flash Card
 - USB Interface
- Load Cell and Cord
- Mounting Hardware
- Card Reader and Software

NOTE: For recalibrating, please call 1-800-533-2077, for RMA.

THE BLUE OX™ CABLE PULLER

The Blue Ox™ Cable Puller

Combining years of experience, field research and end user feedback, The Condux Blue Ox™ Cable Puller has been designed to excel in the most demanding utility applications. Featuring 8,500lbs of continuous pull force, a heavy duty steel frame and hydraulically controlled boom and outriggers, The Blue Ox does not require the arm to be supported during pulling operations. The extendable - up to 90" - steel boom arm boasts 150° of lateral adjustment, providing easy access in even the most confined areas.

Part Number	Description
08773001	The Blue Ox Cable Puller without Compressor
08773000	The Blue Ox Cable Puller with Compressor

The Boom Arm features the ability to pull 85° from the manhole; eliminating the need for an A-Frame.

Outriggers allow The Blue Ox to pull directly over the hydraulics without being hooked to a tractor or a truck.

THE BLUE OX™ CABLE PULLER

POWER CABLE ISNTALLATION

The combination of the outrigger and the boom arm allows for easy pulling 80° from the right or left of center

THE BLUE OX™ CABLE PULLER

7" COLOR DISPLAY
gives all of the information
you need during the pull

APS75 CABLE PULLER

APS75 Cable Puller

The Condux APS75 Hydraulic Underground Cable Puller provides up to 7,500 lbs of continuous pulling power to tackle some of the toughest pulling applications.

Designed for installing underground cable, the APS75 is completely self-contained and transports easily from jobsite to jobsite. Industry leading features like antitwist rope, digital monitoring, rotating pulling arm and wired remote control make the APS75 the most advanced pulling system on the market today.

The APS75 is precision manufactured to the highest standards. Each puller is backed with years of underground cable pulling experience and a commitment to quality customer service.

Part Number	Description
08773501	APS75 w/Hydraulic Arm & Jacks
08773502	APS75 w/ Compressor & Hydraulic Arm & Jacks

Air Compressor Unit

The APS75 is available with a 185 CFM @ 100 PSI air compressor. The air compressor unit comes with the same standard features as the non-compressor unit.

HYDRAULIC TOOL CIRCUIT

Each unit comes standard with a hydraulic tool circuit to operate additional hydraulic powered tools. The fully enclosed sound attenuated hydraulic power pack offers 40 gpm pump & motor with a 20 gallon filtered reservoir. Seven gpm @ 2000 psi is available for hand tools and pumps.

THE BRANDS YOU KNOW

Major engine, hydraulic system and trailer components are from widely popular national suppliers meaning excellent reliability and spare parts availability.

STABILITY

The APS75 is designed with a low center of gravity, excellent F/R weight distribution, and numerous adjustable supports for optimum stability for both the road and the job.

APS75 CABLE PULLER

POWER CABLE INSTALLATION

TIER4 Final DIESEL ENGINE provides 49 HP and features easy access maintenance. Water cooled.

USB PORT

Standard USB connection allows users to record and download pulling operations on a laptop. Information is downloaded as a .csv file and can be downloaded onto any computer, then printed, saved and/or emailed.

HYDRAULIC JACKS

Hydraulically powered jack stands are easy to use and improve set up time.

FULLY ENCLOSED UNIT

The APS75 is safe, convenient and reliable. Includes noise reducing material.

ON BOARD TOOLBOX is also fully enclosed.

ELECTRIC BRAKES with a 7 pin round connector standard.

HYDRAULIC PULLER UNITS WITH OIL COOLER provide smooth operation throughout the pull.

SAFETY

All moving parts are housed safely in enclosures or protected by guards to help improve operator and jobsite safety. The trailer unit also comes standard with electric brakes.

ANTITWIST ROPE WITH LEVEL WIND

Comes standard with 2600 ft. of antitwist rope and built-in reel winder with automatic level wind. Advantages include high flexibility, absolute minimal cable twisting and equal distribution of tension among primary wires. Results in increased pulling efficiency, less duct abrasion and can be spliced in the field.

EASY TO OPERATE

The APS75 features an easy-to-read control panel that includes a convenient hard-wired remote that helps improve safety by allowing the operator to monitor the manhole while distancing himself from noise and moving components.

APS75 CABLE PULLER

Other Standard Features:

- Easy to operate control panel
- DOT Certified Trailer
- Electric Brakes with a 7 pin connector standard
- Noise reduction materials around engine compartment
- Dynamometer integrated in the puller to control pull limits.

Electronic Information Center

A digital readout allows the operator to view pulling forces, distance pulled, tension limiter and hydraulic pressure readings. Tension limits are setup quickly and easily. The APS75 also comes standard with a wired remote control to provide the operator added safety and convenience. Emergency stop buttons located on the main panel and remote control will stop the pull operations immediately when pressed. Pulling operations can be recorded and downloaded after the pull through a convenient USB port located under the wired remote.

- Control lever for pull in, neutral and payout
- Digital dynamometer with set point and automatic control of maximum pull with load cut-off.
- Digital footage counter that reads the footage of pulling rope paying in or paying out.
- Warning lights

APS75 SPECIFICATIONS		
	Standard	w/Compressor
Performance		
Maximum Line Pull (lbs)	7500	
Maximum Speed (fpm)	175	
Engine		
Engine Type	Diesel	
Horsepower	34	
Electrical System	12 volt	
Fuel Tank (g)	18	
Bullwheel		
Dimensions	8.5 inch dia with 6 grooves	
Rope Reel w/Built in Level Wind		
Antitwist Rope	2600 feet of $\frac{3}{8}$ inch

Velocity		185 cfm @ 100 psi
Compressor Hose with Couplings		$\frac{3}{4}$ " x 50' air hose reel

APS75 CABLE PULLER

POWER CABLE INSTALLATION

Aluminum A-Frame

The APS75 A-frame extension adds productivity by adjusting quickly to difficult pulling situations. Added reach for pulling extra slack is ideal for manhole applications and challenging job site conditions.

Part Number	Description
08771350	Aluminum A-frame APS75

Antitwist Rope

Part Number	Description	Break Strength
08771275	3/8" x 2600' Antitwist Rope	15,000 lbs.

*Rope comes standard with a woven eye.

"At Condux, we strive to design and build quality products that will help our customers become safer and more efficient with cable installation."

WDR505 CABLE PULLER

WDR505 Cable Puller

The Condux WDR505 Hydraulic Underground Cable Pulling Trailer provides up to 9,000 lbs. of continuous pulling power (11,240 lbs. max pulling force) to tackle the toughest underground pulling applications.

Designed for installing underground cable, the WDR505 is completely self contained and transports easily from jobsite to jobsite. Industry leading features like anti-twist rope and modular extension arms make the WDR505 one of the most advanced puller on the market today. An advanced electronic information system is also available for monitoring and documenting vital pulling functions.

The WDR505 is precision manufactured to the highest standards. Each puller is backed with years of underground cable pulling experience and a commitment to quality customer service.

Part Number	Description
08763030	WDR505 Underground Pulling Trailer
08763030-1	WDR505 Underground Pulling Trailer with Electronic Control Box
08763030-1R	WDR505 Underground Pulling Trailer with Electronic Control Box and Remote
08763030R	WDR505 Underground Pulling Trailer with Remote

NYLATRON® ROLLERS

have a super-hard surface and last longer than conventional cast rollers.

*Nylatron is a registered trademark of DSM.

DYNAMOMETER INTEGRATED IN THE PULLER unit to control pull limits to cable manufacturer specs. Automatically adjusts pull speed to limit pull load during pull.

AUTOMATIC PAY-IN AND PAY-OUT offers more operator control and safety.

ROTATING ARM pivots 15° in either direction aligning easily and accurately.

HYDRAULIC PULLER UNITS WITH OIL COOLER provides smooth operation throughout the pull.

PULLING POWER

The WDR505 has the capacity to handle virtually all underground pulling applications with 11,240 lbs. maximum force, & 9,000 lbs. continuous force at a maximum speed of 219 ft./minute.

ANTITWIST ROPE

Advantages include high flexibility, absolute minimal cable twisting and equal distribution of tension among primary wires. Results in increased pulling efficiency, less duct abrasion and can be spliced in the field. 2,600 ft. standard.

THE BRANDS YOU KNOW

Major engine, hydraulic system and trailer components are from widely popular national suppliers meaning excellent reliability and spare parts availability.

WDR505 CABLE PULLER

POWER CABLE ISNTALLATION

STRAIGHTFORWARD OPERATOR CONTROLS

CONTROLS allow equipment operator to safely operate the puller with a very short training period.

DIESEL ENGINE provides 45 HP and features easy access maintenance. Water cooled.

QUIET, PLEASE

Noise is reduced due to the self-contained design of the cable puller trailer, and especially because of extensive use of noise abating materials in the engine surround and control panel covers. Adds comfort and safety to your jobs.

FULLY ENCLOSED UNIT features separate door for operating controls. The WDR505 is safe, convenient and reliable.

ON BOARD TOOLBOX is also fully enclosed.

DOT CERTIFIED TRAILER

ELECTRIC BRAKES with a 7 pin round connector standard.

CONTROL IN, CONTROL OUT

With the Condux electric over hydraulic joystick, both pay-in and pay-out are in your control. No "free-wheeling" necessary.

STABILITY

The WDR505 is designed with a low center of gravity, excellent F/R weight distribution, and numerous adjustable supports for optimum stability both on the road and on the job.

EASY TO OPERATE

Condux designed the WDR505 with the operator in mind. Easy-to-read control panel can be accessed separate from the rest of the machine, keeping the operator isolated from noise and moving parts.

WDR505 CABLE PULLER

Versatility:

Standard Features:

- Closed hydraulic circuit for stepless speed variation in both rotating directions.
- Negative self-acting hydraulic brake.
- Hydraulic dynamometer with set-point and automatic control of maximum pull.
- Hydraulic oil cooling system.
- Noise reduction protection.
- Trailer comes standard with Torsion axle, electric brakes and electric breakaway kit, pintle eye, safety chains, job box and light kit.
- Built-in reel winder with automatic level wind.
- 13 $\frac{3}{4}$ " Bullwheels.

SPECIFICATIONS

WDR505 CABLE PULLER

POWER CABLE INSTALLATION

A-Frame

When used with the WDR505 Hydraulic Underground Puller, The A-Frame allows the pulling of up to 16 feet of slack. Manufactured with aluminum channel, comes standard with two locking pins.

Specs:

Weight: 125 lbs
 Length when closed: 72 inches
 Length when fully extended: 100 inches
 Work load Capacity: 11,000 lbs

Part Number Description

08763280 A-Frame Arm Aluminum WDR505 Weld

Quad Block

Designed to fit on the end of the WDR505 Aluminum Boom Arm when using the A-Frame.

Specs:

Cable Capacity: 3.50 inches
 Radius: 18 inches

Antitwist Rope

Part Number	Description	Break Strength
08763360	½" x 2600' Antitwist Rope	24,000lbs
08763370	½" x 2000' Antitwist Rope	24,000lbs

*Rope is shipped on a 32" diameter wood reel.
 *Rope comes standard with one crimped eye.
 *2600 foot length rope fits on units with Cummins Engines.

Electronic Information Center

Condux designed the WDR505 with the operator in mind, with the exclusive real-time recording or downloading option for review of critical information during the pull, or afterwards. Get speed, force, distance, date, time and project name documented and printed on demand.

Part Number	Description
21011629	Replacement Chart Paper DLR100
21011510	Replacement Ink DLR100
21001962	New Electronic Control Box DLR300
08763330	Retrofit old 505 units from DLR100 to 300
TV008700041	Replacement paper for DLR 300

Features:

- Serial port for PC connection
- Integrated graph printer
- Real-time monitoring and display

08936075	Lube Adapter Plates for Flex Guides	6 152

5 or 6 Gallon Lube Pump

Lube pump quickly attaches to the lube adapter plate. Comes with four feet of hose. (Longer lengths not available) Fits on either a 5 or 6 gallon pail.

Part Number	Description
08931100	5 or 6 Gallon Lube Pump

CONDUX

Jamb Skid

The Condux Jamb Skid is a device for supporting sheaves or quadrant blocks inside a manhole to pull cable into underground conduit.

By positioning the top of the jamb skid against the underside of the manhole opening, and using the camlock foot pedal, set-up can be done in a fraction of the time it takes to install a hanging sheave assembly. Pulling tension actually increases the stability of the Jamb Skid during the pull. No dangerous breakage of chains or straps. The Jamb Skid is especially useful when there are no pulling-in irons available, or when the existing irons do not align correctly with the duct opening. The Jamb Skid can be placed anywhere within a 360° radius inside the manhole.

Constructed of solid aluminum, the Jamb Skid is both strong and lightweight. In most instances, it can be installed by one person. The complete unit is created by combining a base unit with one of several extension units, depending upon the height required. Locking 1 $\frac{1}{4}$ " (32 mm) pins, allow the height adjustment of the Jamb Skid. Also, the width adjusts from 7" (178 mm) to 11" (279 mm) to accept all Condux sheave assemblies up to 8" (203 mm). 10,000 lbs. (44,480 N) cable tension load rated.

NOTE: Order base section and choice of extension separately for a complete Jamb Skid unit. Locking pins are included with the base section.

Part Number	Description	Manhole Height Range (in) (m)	
08097000	58" (1.17 m) (Base Section)		
08097001	43" (1.09 m) Extension	63-80	1.24 - 2.03
08097002	76" (1.93 m) Extension	78-109	1.98 - 2.77
08097003	109" (2.8 m) Extension	107-138	2.72 - 3.51

Replacement Pins

Part Number	Description
08097040	1 $\frac{1}{4}$ " (32 mm) diameter pin
08097060	Locking Pin Kit

Sheaves

Refer to the chart on page 105 for specifications on sheave products for use with the Condux Jamb Skid.

CABLE GUIDES

Heavy Duty Hanger Sheaves

Tie off in the manhole to guide cable into the duct. 12,000 lbs. (53,378 N) cable tension load capacity. Includes light duty arm which conveniently stores inside the heavy duty arm when not in use. Also may be used with alignment arm for cable removal (5" sheaves only). Alignment arm sold separately. See replacement sheave chart for specifications on page 105.

CABLE GUIDES

60 Degree Quad Block

A series of six Nylatron® sheaves allow cable to make a gradual 60° turn for easy pulling through manhole or pull box openings. Pulling radius of 24.25 inches (616 mm). 4,000 lbs. (17,792 N) cable tension load capacity. Support bar sold separately.

Part Number	Size (in)	Size (mm)
08539220	8	203

Fairlead Quadrant Block

Originally designed to install transpacific fiber optic cable, these quadrant blocks provide a 60" (1,524 mm) pulling radius to guide any type of cable. 18 machined rollers on bronze bearings, 8" (203 mm) wide by 5.5" (140 mm) in diameter, allow the cable to make a gradual 90° turn for easy cable installation. 10,000 lb. (44,480 N) capacity. Replacement Sheaves available, contact factory for information.

Part Number	Description	A (in) (mm)	B (in) (mm)	C (in) (mm)
08094500	Fairlead Quadrant Block	96 2438	36 914	9 229

Three Sheave Cable Guide

Three cast aluminum or Nylatron® sheaves on bronze bearings allow a gradual 90° turn for easy pulling through manhole opening. Pulling radius of 24" (610 mm), the cable guide will sit on manhole edge, suspend in manhole, or fit the jamb skid. 10,000 lbs. (44,480 N) cable tension load capacity. Support bar sold separately (see pg. 102). Replacement Sheaves available. See Specifications and Selection Charts on page 105.

Part Number	Nylatron Part Number	Size		Weight

08539800*	08539810*	8	203	164	92

*NOTE: To fit the jamb skid, the four bolts holding the hook must be removed.

Mini Corner Cable Guide

Features two hardened steel rollers that guide steel winch line over sharp edges. It is small but sturdy, allowing for easy handling and set-up along with heavy duty capacities. 10,000 lbs. (44,480 N) cable tension load capacity. Replacement Sheaves available, contact factory for information.

Part Number	Description
08045000	Mini Corner Cable Guide
08045010	Mini Corner Cable Guide w/o hook

CABLE GUIDES

Corner Cable Guides

Aluminum and Nylatron® sheaves for pulling cable into manholes. 5,000 lbs. (22,240 N) cable tension load capacity. See Specifications and Selection Charts on page 105 for Replacement Sheaves. Support bar sold separately (see below).

Part Number	Nylatron Part Number	Size	
		(IN.)	(MM)

Cable Bending Shoe

Protects cable from corner abrasion during pulling operations. Rugged, high-impact plastic.

Part Number	Description	ID (in) (mm)	OD (in) (mm)
08042100	Plastic Bending Shoe	3.19 81	3.44 87

Nylon Cable Protector

Flanged, split tube to insert in duct end and protect cable from damage during installation. Also can be left in place for permanent protection.

Part Number	Description
08042301	1"-2½" (25–63 mm) Duct
08042300	3"-6" (76–152 mm) Duct

Support Bar

Use to support quadrant blocks or cable guides at street level.

Part Number	Description
08091440	1¼" (32 mm) x 4' (1.2 m) Steel Bar

Chains

Used to tie off cable guides in the manhole. Not to be used for overhead lifting.

Part Number	Description
08066301	4' (1.2 m) Chain, Double Hook, 3/8" (9 mm) Alloy Links, 7,100 lbs. (31,581 N) capacity
08066300	8' (2.4 m) Chain, Double Hook, 3/8" (9 mm) Alloy Links, 7,100 lbs. (31,581 N) capacity

CABLE GUIDE ACCESSORIES

Aluminum Split Bells

Plugs into conduit in manhole wall, guiding cable safely into the conduit regardless of the pulling angle.

FIBER OPTIC CABLE BLOWING METHOD

An Efficient Method

Fiber optic cable blowing is one of the most efficient and safe means of installing fiber optic cable. A pressurized blowing system uses two forces to install fiber optic cable. A pulling force combines with a pushing force to cause the cable to travel through the duct like air. Today's fiber optic cable installations benefit from the pressurized blowing system because it provides greater installation speeds with less stress than traditional cable pulling.

The cable blower unit utilizes a hydraulic power system and an air compressor to generate the desired push and pull forces. Working together, this dual power supply provides greater blowing power with lower air consumption. Controls and gauges on the cable blower allow the operator to monitor the forces being exerted on the cable. The operator can make adjustments to make sure the forces being exerted on the cable are working with one another, not against one another.

Blowing minimizes the stress placed on cable during installation. Because the cable blower provides both pulling and pushing force, stress is balanced. For example, at 135 psi (9.3 bar) in 2 inch (51 mm) duct only 430 lbs (1,913 N) of pulling force is generated.

FIBER OPTIC CABLE BLOWING METHOD

Blowing vs. Pulling

Blowing cable is different from pulling cable in several ways. During cable pulling, the cable is kept taut and only pull force is applied. It travels in a straight line until a bend or curve changes its path. The cable ultimately rubs on each of the bends or curves, creating friction. As more pulling force is added to counteract the friction, additional stress is added to the cable.

Compared to a pulling application, blowing cable is faster and puts the cable under less stress.

Through cable blowing, contractors are able to install more cable per day with less manpower. This means increased productivity and decreased cost.

How To: The Typical Process

The typical cable blowing process consists of several steps. **First**, the duct integrity is checked. It is pressurized to check for leaks. In order to ensure a successful installation, the duct must be airtight and free of obstruction. Then a small amount of lubricant is poured in the duct and a foam carrier is blown through the run, confirming its integrity.

Second, the cable is prepared for installation. A cable carrier is attached to the end of the fiber optic cable. Corresponding size cable carriers are available to match the specific duct ID. The cable is fed through the cable blower and into the duct.

Third, the duct is lubricated. Lubricant is added in front of the cable carrier and behind the cable carrier.

Fourth, the blowing process begins. Pressure (compressed air) is applied to the duct behind the cable carrier. As the pressure tries to equalize, it seeks out the path of least resistance and creates a pushing force on the cable carrier, causing forward motion. The moving cable carrier, in turn, exerts a pulling force on the cable and begins to move it through the duct.

Meanwhile, an additional pushing force is applied to the cable by a hydraulic powered tractor drive on the cable blower. Use of a hydraulic tractor drive reduces air consumption requirements from the air compressor. Plus, the push force from the tractor drive provides cable slack, reduces back tension and keeps the cable loose and flexible. Friction and resistance are then reduced and the cable can travel freely through the duct work.

GULFSTREAM™ 400

Fiber Optic Cable Blower

The Condux Gulfstream™ 400 Fiber Optic Cable Blower is ideal for Fiber Installations

As a leader in the manufacture of cable installation tools and equipment, Condux offers a superior Fiber Optic Cable Blower that is compact and lightweight, making it ideally suited for your most difficult job sites. An updated design has increased portability and made operation easier than ever.

Fast

Install fiber optic cable up to 300fpm (900mpm). The cable travels at the same speed as the air! A carrier is always attached to the front of the cable. Compressed air propels the carrier and cable through the air-tight sealed duct. And, because air flow and tractor drive speed can be adjusted, you can install fiber at the rate which best suits any application.

Total Control

The Condux Gulfstream 400 Fiber Optic Cable Blower features longer tractor feed grip area for less stress on the cable, and a manual cylinder on the tractor feed to better control down pressure. Condux's patented traction control system shuts down the blower when problems with cable slippage or duct blockage are detected, adding safety to every job and preventing costly cable damage.

A speed and distance counter with LCD read-out, as well as convenient hydraulic and pneumatic controls, come standard with the Condux Fiber Optic Cable Blower. Blowers equipped with the Advanced Electronic Control System will shut down if slippage, over-speed or cable stoppage is detected.

Versatility

The Condux Gulfstream 400 Fiber Optic Cable Blower operates efficiently with most common combinations of cable and innerduct sizes. The Condux Gulfstream 400 Fiber Optic Cable Blower is designed for the installation of fiber optic cables with diameters from 0.23" (5.8 mm) to 1.13" (28.7 mm) into micro duct 10 mm to 18 mm and traditional innerduct $\frac{1}{2}$ " (13 mm) to 2" (51 mm) with metric sizes available.

The correct size cable seals and venturi must be determined for the cable being installed. Also necessary are the correct size innerduct seals, clamps and carrier for the innerduct being occupied.

Use the charts on page 112-113 to determine the correct size components for your specific cable and innerduct installation project.

CONDUX

GULFSTREAM™ 400

Superior Service & Support

The Condux Fiber Optic Cable Blower is precision manufactured in the USA by Condux International, Inc. Over four decades of technical experience and superior customer service is behind every product sold.

Smart Design, Easy to Operate

Convenient tilting of the Condux Gulfstream 400 Fiber Optic Cable Blower for ease of pouring in lubricant. Easily install cable into rollers, then close and you are ready to start.

Hydraulic & pneumatic controls are ergonomically designed and conveniently located. No special maintenance is required.

Lightweight & Portable, Everything's Inside

The Condux Gulfstream 400 Fiber Optic Cable Blower is extremely easy to handle and transport. The blower and all accessories including hydraulic hoses, cable and conduit packs and seal kits conveniently fit into a lightweight job box with wheels.

GULFSTREAM™ 400

Belt Tractor Drive

Single belt tractor drive provides for smooth and quiet operation. The belt can be easily removed and replaced making maintenance fast and simple.

Advanced Electronic Controls

Standard system monitors and displays the cable and tractor drive speeds. Will automatically shut off the blower in these conditions:

- Over pressure limit
- Slippage
- Over-speed
- Cable stoppage

Part No.	Description
08781020	Electronic Control Box
08781022	Electronic Control Box & Transducer Update
08781023	Transducer
02290843	ECB Fuse

Hinged Air Block & Conduit Clamp

The Condux Fiber Optic Cable Blower features a hinged air block and a hinged conduit clamp that are easily secured and opened with the use of a ratchet.

Dual Power System

Designed to operate with two power supplies that work in tandem in order to produce the most steady, efficient and reliable power to blow cable. A hydraulically-powered tractor drive supplements the pressurized air force, thus decreasing the CFM requirements of the air compressor. This means greater cable blowing efficiency using a much smaller air compressor.

GULFSTREAM™ 400

CONDUX

The Condux Gulfstream™ 400 Fiber Optic Cable Blower is easy to order. The base unit comes complete with a job box, hydraulic hoses and everything listed below in the "Common Parts Package." Complete the order by specifying the cable pack(s) and duct pack(s) necessary to meet your exact job requirements. See pages 112-113 for full descriptions. You may order additional cable and duct packs at any time.

FIBER CABLE INSTALLATION

How Much Air?

Pressure

During pressurized blowing applications, as the duct size increases and the pressure remains constant, the pulling force increases geometrically. When used properly, the amount of pulling force placed on the cable by the Condux Fiber Optic Cable Blower cable carrier remains below the cable's recommended maximum pulling tension for two reasons. First, the blower is designed for use with a maximum 2 inch (51 mm) diameter duct. Second, the maximum amount of pressure applied by the blower during installation never exceeds 150 psi (10.3 bar).

At that pressure, with a 2 inch (51 mm) duct, a maximum pulling tension of 482 lbs. (2,145 N) can be generated on the cable by the cable carrier. This is well below the 600 lbs. (2,668 N) recommended maximum pulling tension for most cable types. Ducts smaller than 2 inches (51 mm) or pressures lower than 150 psi (10.3 bar) will result in lower maximum pulling tensions.

Flow

Duct size also determines the compressor flow needed for proper installation. For innerducts from 1-1/4 inches (25–31 mm) in diameter, a 175–275 SCFM (5–8 cu meters/min) compressor is recommended. For innerducts from 1½–2 inches (28–51 mm) in diameter, a 275–375 SCFM (8–11 cu meters/min) compressor is recommended. Compressor flow should be doubled if the distance exceeds 6,000–8,000 feet (1.8–2.4 km).

GULFSTREAM™ 400 MICRODUCT ACCESSORIES

Multiple Micro Duct Installation Kits

Condux Multiple Micro Duct Installation Kits allow you to install up to 5 - 10/8 micro ducts, 4 - 12/10 micro ducts or 4 - 12.7 micro ducts into an existing innerduct, when used with the Condux Gulfstream™ 400 Fiber Optic Cable Blower.

Features & Benefits

- Portable
- Easy to Use
- Duct Range 1.315" – 2.375" (33mm - 60mm) OD
- Cable Seal Range 0.35" – 0.90" (9mm - 23mm) OD
- Aluminum Construction
- Built-in Carrying Handles
- Canvas Storage Bag

MINI-BLOWER PUSHER

Mini-Blower/Pusher

The Mini-Blower/Pusher from Condux is the lightweight, portable solution for easy installation of micro fiber and traditional fiber optic cable. The compact unit is ideally suited for your most difficult job sites and "last mile" fiber installations. An updated design has made operation easier than ever.

Backed by years of fiber blowing experience, the Mini-Blower/Pusher is designed for the installation of fiber optic cables with diameters from 0.23" (5.8 mm) to 0.50" (12.7 mm) into micro duct 10 mm to 18 mm or traditional duct from 0.50" (12.7 mm) to 2" (50.8 mm).

Part Number	Description
08780800	Mini-Blower/Pusher
08780801	Mini-Blower/Pusher Job Box with Kit for 12 mm & 12.7 mm duct and includes cable packs 1 & 2 in the Mini-Blower/Pusher cable pack chart on page 117 (08780802, 08780804)
08780865	Mini-Blower/Pusher Job Box with Kit for $\frac{3}{4}$ " & $1\frac{1}{4}$ " duct and includes cable packs 1, 2 & 3 in the Mini-Blower/Pusher cable pack chart on page 117 (08780802, 08780804, 08780806)
08780860	Job Box Only

Replacement Parts

Part Number	Description
08081320	Flat Roller for Flat Fiber
08081319	V-Grooved Roller Bottom
08081313	Top Roller Sleeve

See pages 117-118 for
Cable Packs and Duct
Packs.

Heavy Duty Tripod

The Mini-Blower/Pusher mounts easily to the surveyor style tripod, which adds stability and versatility to fiber optic cable installations.

Part Number	Description
08780850	Heavy Duty Tripod

MICRO FIBER BLOWER ACCESSORIES

CONDUX

Innerduct Eyes for Micro Duct

Tapered buttress threads into the micro duct for maximum pulling strength.

Part Number	Description
08913547	Innerduct Eyes for Micro Duct (5-9 mm ID)
08913545	Innerduct Eyes for Micro Duct (10-13 mm ID)
08913538	Innerduct Eyes for Micro Duct (13-15 mm ID)

Multiple Pulling Harness for Micro Duct

Installation

Six leg harness with 3-inch separation between legs for installing micro duct into existing innerduct.

Part Number	Description	Load Rating
08549350	Multiple Pulling Harness	550lbs (2,446 N)

Micro Fiber Carrier Kit

Designed to attach to the central strength member (CSM) of the cable. The seals are sized to accommodate the proper ID duct size for maximization of the blowing distances and create an airtight seal in the duct.

Part Number	Description
08764090	Micro Fiber Carrier Kit

PSI Shuttles

These unique, flexible shuttles are available in triple parachute configuration, making rope, pull tape and fiber optic cable installation in occupied duct a breeze. These shuttles can be used on their own or in series allowing for up to six parachutes to capture the air within the conduit, which can help increase installation distances. The parachutes collapse without constant air pressure allowing for easy pullback.

Part Number	Duct Size	
	(in)	(mm)
08761868	1.00-1.25	25-32
08761869	1.50-2.00	38-50

Polywater® Prelube 5000™

Polywater® Prelube 5000™ is more concentrated than the Prelube 2000™. It is intended for blowing microcable into small diameter microtubes. The improved chemistry allows this product to spread further and reduce friction levels. The lower viscosity allows practical application into the microtubes.

Part Number	Description	Case Lots
08230675	Polywater® Prelube 5000™	6/case

GULFSTREAM™ 350

NEW! Gulfstream™ 350 Blower

The new Condux Gulfstream 350 Fiber Optic Cable Blower is all pneumatic and comes complete with a convenient storage case. With the ability to install fiber from 0.16" - 0.62" (4 - 16mm) into duct ranging from 0.50" - 1.25" (8 - 42mm), the Gulfstream 350 provides a mechanical counter, speed indicator, and maximum belt visibility. Complete the order with cable packs and duct packs on page 120 and 121 to meet the exact job requirements.

Gulfstream™ 350 Micro Fiber Blower

Part Number	Description
08784601	Gulfstream 350™ Pneumatic Blower, US
08784602	Gulfstream 350™ Pneumatic Blower, Int'l

Size

- Dimensions: 520mm (l) x 372mm (w) x 293mm (h)
20" (l) x 14.6" (w) x 11.5" (h)
- Weight: 44lbs/20 kg

Microduct Range

- 8mm - 42mm (.50" - 1.25")

Fiber Cable Range

- 4mm - 16mm (.16" - .62")

Features

- Mechanical Counter/Real Time Distance (Meters and Feet)
- Speed Indicator (Meters and Feet)
- No Tools Required for Belt Replacement
- Maximum Belt Visibility, Transparent Covers for Easy Monitoring
- Emergency Stop Button
- Air Conditioning: Pressure Filter w/ Water Separator & Bleed Valve
- Lightweight Case

Drive

- Pneumatic Drive System
- Maximum push force of 400N (98lbs)
- Average Speed: 38 m/min @ 70N (90 ft/min @ 16lbs)

Force and Flow

Microduct:

- Air Pressure Requirements (BAR)*: 10-15 Bar
- Air Pressure Requirements (PSI)*: 150-205 PSI
- Flow Requirements (CMM)*: 0.5-1.5 CMM
- Flow Requirements (CFM)*: 10-35 CFM

Traditional Duct:

- Air Pressure Requirements (BAR)*: 7-10 Bar
- Air Pressure Requirements (PSI)*: 100-150 PSI
- Flow Requirements (CMM)*: 5-11 CMM
- Flow Requirements (CFM)*: 185-375 CFM

*Air pressure and flow requirements depend on the size of duct and the size of fiber being installed into that duct.

FIBER CABLE INSTALLATION

GULFSTREAM™ 300

Gulfstream™ 300 Micro Fiber Blower

The Gulfstream 300 is an effective and economical approach to middle mile fiber installations. Able to install fiber optic cable ranging in size from 2.5mm to 10mm into duct from 7mm to 18mm, the Gulfstream 300 offers the portability, convenience and power for standard middle mile projects in a cost effective package. Weighing just 10 lbs. (4.54 kg), the Gulfstream 300 is easily transported and can be mounted on a tripod for optimum productivity.

*The Gulfstream 300 no longer uses batteries for power.

48v power supply included with kits

Blower Size

- Dimensions: 6" (h) x 8" (w) x 11"(l)
152mm (h) x 203mm (w) x 279mm(l)
- Weight: 10lbs/4.54kg

Microduct Range

- 7 – 18mm
- Built in clamping system with interchangeable seals

Fiber Cable Range

- 2.5 – 10mm

Power System

- Electric drive motor
- 48v AC Power Supply**
(Plugged into wall or 1000w Generator)

Drive

- Belt drive
- Maximum push force of 30lbs (134N)
- Speed: 0-150fpm (0 – 45mpm)

Controls

- Forward/reverse switch
- Speed control to regulate motor speed
- Emergency stop button for instant shutdown
- Screen that monitors speed, distance and life counter
- Push force adjustment (crash test kick out)

Force and Flow

- Air connections: 3/8" EU or US Coupling
- Air Pressure Requirements (BAR)*: 10-15 Bar
- Air Pressure Requirements (PSI)*: 150-205 PSI
- Flow Requirements (CMM)*: 0.5-1.5 CMM
- Flow Requirements (CFM)*: 10-35 CFM

GULFSTREAM™ 150

Gulfstream™ 150 Micro Fiber Blower

The Gulfstream 150 micro fiber blower is designed for FTTx and Enterprise micro fiber cable installation projects. The self-contained Gulfstream 150 combines the push force of a small electric motor driven belt drive with compressed air to quickly and easily install microfiber cables from 1.0mm to 2.5mm in diameter into microduct ranging in size from 5mm to 8.0mm, at speeds up to 375 feet per minute!

The unit's machined aluminum construction provides a light-weight profile with long life and durability. The Gulfstream 150's compact size and convenient carrying case allow for easy transport between job sites.

***The Gulfstream 150 no longer includes a battery or charger.**

Requirements listed below and must be sourced by installer.

- Dimensions: 8" (h) x 6" (w) x 4"(l)
203mm (h) x 152mm (w) x 101mm(l)
- Weight: 5lbs/2.27kg

Microduct Range

- 5 – 8mm
- Built in clamping system with interchangeable seals

Fiber Cable Range

- 1 – 2.5mm

Power System

- Electric drive motor
- Rechargeable battery pack with belt clip
- 12v (US) or 10.8v (EU) Cordless Battery or AC Power Supply (optional)

Drive

- Roller Cover
- Maximum push force of 4.5lbs (20N)
- Speed: 0-375fpm (0 – 115mpm)

Controls

- Screen that monitors speed and distance - life counter
- Forward/Reverse switch
- Speed & torque control to regulate motor speed

Force and Flow

- Air connections: 1/4" EU or US Coupling
- Air Pressure Requirements (BAR)*: 10-15 Bar
- Air Pressure Requirements (PSI)*: 150-205 PSI
- Flow Requirements (CMM)*: 0.5-1.5 CMM
- Flow Requirements (CFM)*: 10-35 CFM

*Air pressure and flow requirements depends on the size of duct and the size of fiber being installed into that duct.

08783085	A/C Power Supply - US

CABLE BLOWING LUBRICANTS/AIR COOLER

Polywater® Prelube 2000™

Specially formulated for use with Fiber Optic Cable Blowing Systems, Polywater® Prelube 2000™ has been field proven with Condux Gulfstream Fiber Optic Cable Blowers. This lubricant is a special lubricant used to prelubricate the conduit system before installing the cable. Prelube 2000 is compatible with all types of cable jackets and conduit types.

Part Number	Description	Std. Pkg. Qty.
08230600	1 Quart (0.9 liter) Standard Grade	12/case
08230601	1 Gallon (3.8 liter) Standard Grade	4/case
08230605	5 Gallon (19 liter) Standard Grade	

Polywater® W-Prelube 2000™

Polywater® W-Prelube 2000™ Winter Grade is a non-freezing form of the standard Polywater Prelube 2000™.

Part Number	Description	Std. Pkg. Qty.
08230900	1 Quart (0.9 liter) Winter Grade	12/case
08230901	1 Gallon (3.8 liter) Winter Grade	4/case
08230905	5 Gallon (19 liter) Winter Grade	

Polywater® Prelube 5000™

Is more concentrated than the Prelube 2000™. It is intended for blowing microcable into small diameter microtubes. The improved chemistry allows this product to spread further and lower friction at extremely low coating levels. The lower viscosity allows practical application into the microtubes.

Part Number	Description	Std. Pkg. Qty.
08230675	8-fl ounce (227 g) squeeze bottle	6/case

Compressed Air Cooler

Extreme heat can inhibit fiber optic cable installation and damage fiber optic cable and duct. When cable blowing, air is compressed and heat is generated. For example, air that enters a compressor at 100° F (37° C) exits the compressor at 350° F (176° C). At this temperature, fiber optic cable jacket and duct softening can occur. Heat problems can also occur if the duct run is exposed to direct sunlight. The Condux Compressed Air Cooler can help prevent heat damage to fiber optic cable and duct during cable blowing operations.

The Condux Compressed Air Cooler cools compressed air from a maximum temperature of 350° F (176° C), to within 20° F (11° C) of the ambient temperature. For example, if the ambient temperature is 100° F (37° C), air from the air compressor enters the air cooler at 350° F (176° C). That air will leave the cooler at approximately 120° F (49° C). Cooling the air reduces the chances of heat damage to the cable and duct. The Condux Compressed Air Cooler also removes moisture from the air. Water from humid air can dilute cable blowing lubricant and collect in the duct run.

Use of the Condux Compressed Air Cooler is recommended when ambient air temperatures reach 90° F (32° C) or more and/or the duct is exposed to direct sunlight.

Minimum ambient operating temperature: 35° F (1° C)

Maximum inlet operating temperature: 350° F (176° C)

Maximum operating pressure: 250 psi (17 bar)

02291174	1 Quart Air Oil

PRESSURE TEST KITS/ACCESSORIES

Micro Duct Pressure Test Kits

Use the Micro Duct Pressure Test Kit before setting up the Gulfstream™ 150/250/300 to pressure test, proof, and lubricate micro duct for optimum performance. For the cable blower to function properly, the microduct system must be able to withstand and hold 200psi (14 bar). Air leaks will reduce the compressors' ability to maintain the required pressure for cable installation. The duct system must also be passable by a proofing ball of roughly 80% fill ratio so that there are no obstructions prohibiting the installation of fiber optic cable. Lubrication may also be desired to reduce the friction involved when installing fiber optic cable. Achieve maximum performance and installation distances by pressure testing, proofing, and lubricating the microduct with the Condux Micro Duct Pressure Test Kit.

08783992	7.5mm Cable Tips (10pcs)
08783994	8.0mm Cable Tips (10pcs)
08783996	8.5mm Cable Tips (10pcs)
08783998	9.0mm Cable Tips (10pcs)

Why an Airtight Duct?

Duct integrity is essential for a successful cable blowing application. Leaks in the duct can lower pressure and greatly reduce installation distances. The duct system must be able to withstand and maintain 200 psi (14 bar) for the

cable blower to function properly. Duct integrity should always be tested before attempting cable installation with the cable blower. The duct can be tested with a pressure test kit available from Condux or with the cable blower itself. Either way, an airtight duct system is

an absolute necessity for cable blowing.

The main contributors to duct system leaks are the innerduct couplings. Condux recommends using one of the innerduct coupling methods shown on page 131.

INNERDUCT COUPLINGS

Speed Ball Split Coupling

Hinged aluminum split coupling for temporarily joining all types of innerduct during a cable blowing process.

Note: Inserts are sold separately.

Part Number	Description
08676844	Hinged Coupling Body

Inserts

Reusable Micro Duct Couplers

The Condux® Reusable Micro Duct Coupler allows for the temporary joining of two pieces of microduct - essential when installing fiber optic cable.

These couplers are ideal for routing duct to the blowing machine or creating loops in downstream handholes. Unlike traditional plastic couplers, the hinged assembly can be removed mid-span and reused.

To be more cost effective, the innovative design utilizes a common body that accommodates a wide variety of inserts - making the Reusable Micro Duct Coupler the most versatile on the market.

CONDUX

Comfit Couplers

Comfit is a unique Hi-Tech coupler for HDPE cable ducts. Leak tested at 230 PSI and resistant to corrosion and most chemicals.

Comfit is designed in accordance with the special demands of the leading cable and duct manufacturers, as well as, top utility and contractors.

Comfit is excellent for both blowing and pulling applications.

Comfit has a compact profile reducing difficulties traditionally encountered in manholes, narrow trenches and plowing machines.

Comfit's push-fit method ensures fast and simple assembly and disassembly. Push the duct ends into the coupler for a locked and air sealed assembly. No special tools are needed.

Max Pressure: 230 PSI

Microfit Couplers

Designed specifically for FTTx applications, the Condux® Microfit Couplers combine ease of use, chemical resistance and ability to accommodate the high pressures encountered when installing fiber with micro-blowing equipment.

The innovative transparent design ensures proper attachment by allowing the installer to visually verify that each end of the duct has been seated properly inside the coupler. Once connected, the air and water tight seal will hold pressure up to 232 PSI (16 Bar) in temperatures ranging from -4°F to 140°F (-20°C to 60°C).

These features incorporated into a push-on, no tools required design, make the Condux® Microfit Coupler an essential component of the professional installers toolbox.

Direct Bury Couplers

Designed specifically for FTTx applications, the Condux® Direct Bury Couplers feature a durable, shock resistant design that will hold up to virtually any terrain or soil condition.

The Direct Bury Coupler's metallic-free construction eliminates damage from oxidation or acidic soil conditions – guaranteeing it will maintain its seal over time. The translucent design ensures a proper connection by allowing the installer to visually verify that each end of the duct has been properly seated.

Once connected, the air and water tight seal will hold pressure up to 232 PSI (16 Bar) in temperatures ranging from -5°F to 113°F (-15°C to 45°C). These parameters will accommodate virtually any application situation encountered in the field - including the high pressures utilized when installing fiber with micro-blowing equipment.

These features incorporated into a push-on, no tools required design, make the Condux® Direct Bury Coupler an essential component of the professional installer's toolbox.

Part Number	Description

AIR COMPRESSORS

NEW! Gulfstream 35® Air Compressor

The Condux Gulfstream 35® Air Compressor with Integrated air cooler is ideal for the Condux Gulfstream micro blowers. Featuring a collapsible handle, the GS35 compressor is compact, lightweight and easily maneuvered through standard gates and doorways. This compressor provides constant air flow and pressure, regardless of the time it takes to complete the job, because of the 100% continuous duty cycle and rotary screw air end. Above all, the compressor is easy to use, with a stop/start switch, pressure control on/off levers and a user friendly control panel.

A **LIFETIME WARRANTY** is available on the Rotary Screw Air End if Condux Shield Works lubricant and filters are used at the recommended maintenance intervals. Lubricant and filter should be replaced after the first 50 hours and complete service once per year (or at 500 hours, whichever comes first). Must complete and return registration card to begin program. See online manual or contact Condux Customer Service for complete details.

M17 Air Compressor

The Mobilair™ M17 is a rugged and dependable unit that is perfect for a variety of applications. With a folding handle, oversized pneumatic tires, and compact design, this unit is easy to move around virtually any job site.

The M17 features Kaeser's power saving Sigma Profile™ airend. This efficient Kaeser design maintains steady pressure and puts out more air per hp, saving you gas. Driving these airends is a quiet but powerful Honda engine with modulation control which matches air output to the load demand. It has a simple electric starter with keyed ignition and an easy-to-read control panel.

The scratch, dent, and impact resistant rotomolded polyethylene shell takes a beating and still protects the unit. Inside, the compressors are protected by 4 micron inlet filters rated at 99.9% efficiency, allowing this unit to operate in virtually any construction environment.

**recommended for the Condux Gulfstream™ 150, 250 and 300*

FIBER OPTIC CABLE PULLER

FIBER CABLE INSTALLATION

Fiber Optic Cable Puller

The Fiber Optic Cable Puller from Condux sets new standards for safe, accurate pulling of fiber optic cables. Only the Condux puller can offer load cell torque input for the most accurate tension measuring available. Unlike most hydraulic measuring systems, this system is not affected by changes in oil temperature, component age and power source. That means the Condux Fiber Optic Cable Puller does not need to be recalibrated under different weather conditions.

NOTE: The Hydraulic Power source is sold separately (see pg. 133).

**12 inch (305 mm) capstan available
30 inch (762 mm) capstan available
42 inch (1067 mm) capstan available
50 inch (1270 mm) capstan available**

Lightweight means easy set-up

Standard Features

These pullers consist of a hydraulic motor, variable speed foot control, manual flow control valve for adjusting maximum speed and a manually adjustable pressure relief valve for adjusting the ultimate pull tension.

Optional Features

The Condux Fiber Optic Cable Puller features an optional electronic tension control system with adjustable digital load limits and a load cell tension measuring device with a paperless recorder and trend display, compact flash drive with 64MB flash card and USB interface (see page 136-137).

Components

Condux Fiber Optic Pullers are multi-component products. Order a puller to fit your requirements with combinations of these components (for ordering information, see page 138-139). Components include:

- Hydraulic puller mounted on a standard 2½" (64 mm) square tube
- Capstan
- Foot control / hydraulic control assembly
- Electronic control box with paperless recorder
- Hoses and cords to connect the puller to the foot control assembly and electronic control box

WARNING: The Fiber Optic Cable Puller is not to be used as a hoist or for lifting, supporting or transporting people or loads.

CONDUX

FIBER OPTIC CABLE PULLER

FIBER CABLE INSTALLATION

Easy to set up, Safe to use

Condux Fiber Optic Cable Pullers set up easily at a variety of jobsite layouts. Components are modular, adding to versatility and operator safety.

Variable Speed Foot Control

Like the accelerator pedal in your car or truck, the Variable Speed Foot Control allows the operator to easily manage the speed of the pull.

Bi-directional Pulling

Bi-directional pulling capabilities mean less set-up time and more productivity.

FIBER OPTIC CABLE PULLER ACCESSORIES

Remote Mounting Stand

For fiber optic cable pulling applications that demand flexibility in set-up, the Remote Mounting Stand allows positioning of the cable puller well away from the power source. Easy to set up, the unit is both sturdy and compact. Features $2\frac{1}{2}$ " (64 mm) square mount.

Part Number	Description
08675115	Remote Mounting Stand

Fiber Optic Cable Puller Hitch Mount

Hitch Mounts are a fast, easy way to mount the Fiber Optic Cable Puller. The Hitch Mount attaches directly into a typical 2" (51 mm) square Reese-type receiver and the cable puller mounts in a $2\frac{1}{2}$ " (64 mm) square fixture. An adjustable jack is included for added stability and height adjustment. Pulling loads must not exceed 800 lbs. (3,559 N).

Part Number	Description
08675908	Fiber Optic Cable Puller Hitch Mount
08675930	Adjustable Fiber Optic Cable Puller Hitch Mount 22.5°

Pole Mounting Frame

When overhead fiber optic cable installation applications require the smooth hydraulic power and accurate tension measuring system of the Condux Fiber Optic Cable Puller, the Pole Mounting Frame is available. Install the cable puller on the frame with no modifications necessary to the puller. By design, the Pole Mounting Frame offers a secure hold on the cable puller both vertically and horizontally for a worry-free pull. A special plug drives into wood poles for added stability. Includes all mounting hardware.

Part Number	Description
08676000	Pole Mounting Frame and hardware

FIBER OPTIC CABLE PULLER ACCESSORIES

Capstans

To conform to the many specifications of fiber optic cable available, and to offer more cable pulling capabilities, Condux offers several sizes of capstans that fit the Condux Fiber Optic Cable Puller. These bayonet style capstans are offered in 12" (305 mm), 30" (762 mm), 42" (1,067) and 50" (1,270 mm) diameters for a standard $2\frac{7}{16}$ " diameter bayonet style shaft.

CONDUX

SLIP CLUTCH CAPSTAN

Slip Clutch Capstan

Slip Clutch Capstans from Condux are designed to mount directly on a bayonet style winch drive shaft. A factory preset torque limiter prevents pulling tensions from exceeding 600 pounds (2,670 N) \pm 10% (60 lbs or 267 N). If the preset load is reached, the capstan will "slip" and discontinue rotating.

High strength aluminum and steel construction ensures product durability and cable protection.

The capstan is factory calibrated to 600 lbs (2,670 N) but can be calibrated to different loads from 200 to 1,000 lbs. (890 to 4,448 N).

The capstan is designed for use with a $2\frac{7}{16}$ " (62 mm) diameter, AT&T specification bayonet style power take-off (PTO) shaft.

FIBER OPTIC CABLE PULLER TRAILER

Not a fully assembled trailer. Fiber Puller, Stand, Power Pack and Capstan are sold separately.

Open Style Fiber Optic Cable Puller Trailer

Access job sites with ease using the Condux Open Style Fiber Optic Cable Puller Trailer. The open style has advantages in portability, accessibility and cost.

On the job, gain easy access to all components with the open face design. Small items can be stowed in a lockable storage compartment. Leveling and stabilizing hardware is included. The Open Face Fiber Optic Cable Puller Trailer comes standard with built-in cable puller mounts on the left and right rear corners.

Options include a choice of two Condux Fiber Optic Cable Puller packages, choice of five capstans, a 13 HP (9.7 kW) Power Pack and a Remote Mounting Stand. The trailer bed is designed to accommodate standard and optional equipment with built-in mounting systems for secure travel.

Build your own Open Style Fiber Optic Cable Puller Trailer Kit

FIBER OPTIC JAMB SKIDS AND CABLE GUIDES

FIBER CABLE INSTALLATION

Fiber Optic Jamb Skid

The Condux Fiber Optic Jamb Skid is a device for supporting fiber optic sheaves or quadrant blocks inside a manhole to pull fiber optic cable into underground conduit.

Constructed of steel tubing, the Fiber Optic Jamb Skid is both strong, 1,000 lbs. (4,480 N) load rated, and lightweight, can be installed by one person.

Part Number	Description	Manhole Height Range (in)	Manhole Height Range (mm)
08097100	46" (1,168 mm) Base Section with locking pins		
08097200	43" (1,092 mm) Extension	49-80	1,244-2,032

Fiber Optic Quadrant Block

Protects fiber optic cable during installation. Pulling radius of 26" (660 mm); 13 aluminum rollers on bronze bearings allow cable to make a gradual 90° turn for easy pulling through manhole opening. Lightweight, corrosion-resistant aluminum side plates. Can be lowered into any manhole opening and chained in place for good alignment or used as a cable guide at street level. 2,600 lbs. (11,565 N) cable tension load capacity. 1½" (38 mm) maximum cable diameter (consult cable manufacturer for minimum bend radius). Support bar sold separately (see page 104). Replacement Sheaves available. See Specifications and Selection Charts on page 105.

Part Number	Description
08539350	Quadrant Block

Hanger Arm

Hanger Arms

Allows the hanging of the Fiber Optic Quadrant Block in a manhole for more flexible positioning.

Part Number	Description
08539320	Hanger Arm

Fiber Optic Hanger Block

Five aluminum rollers on bronze bearings allow cable to make a gradual 90° turn for easy pulling through manhole opening. Has a pulling radius of 12" (305 mm). Two non-metallic "keeper" rollers to hold the cable in place during the pull. Lightweight corrosion resistant aluminum side plates. Can be suspended in the manhole or hung on an overhead pole for easy pulls. ¾" (19 mm) maximum cable diameter (consult cable manufacturer for minimum bend radius). 800 lbs. (3,558 N) cable tension load capacity. Replacement Sheaves available. See Specifications and Selection Charts on page 105.

Part Number	Description
08539550	Hanger Block

FIBER OPTIC CABLE GUIDES

Fiber Optic Sheave Mount

Fiber Optic Sheave Mounts are an ideal solution to mid-point cable pulling situations. The adjustable sheave mount allows pinpoint adjustment from horizontal to vertical. Portable components set up quickly and adjust from job to job, offering maximum versatility with minimum equipment. Uses a standard 2½" (64 mm) square mounting post for use with FO Cable Puller Remote Mounting Stand (see page 138) or Mounting Sockets (page 140).

Fiber Optic Sheave Mount Components

Part Number	Description
08637900	Adjustable Sheave Mounting Head (includes sheave mounting shaft & pins)
08637909	18" (457 mm) Center Tube Mount
08637910	32" (812 mm) Center Tube Mount

Fiber Optic Sheave Mount Packages

Part Number	Description
08637930	Adjustable Fiber Optic Sheave Mount, Pkg 1 Includes mounting head, all 3 mounting tubes, sheave and sheave arm assembly.
08637940	Adjustable Fiber Optic Sheave Mount, Pkg 2 Includes mounting head, all 3 mounting tubes, and sheave.

Fiber Optic Sheave Mount Package 1

Fiber Optic Sheave Mount Package 2

FIBER OPTIC CABLE GUIDES & PULLING LUBRICANT

Overhead Fiber Optic Cable Sheave

Specially designed for guiding fiber optic or CATV cable safely and efficiently, Condux Cable Sheaves feature an innovative hanger arm that eliminates the possibility of cable coming off the sheave or binding against the support arm. With the removal of a pin, the hanger arm separates and allows cable to be slipped in easily, even at midpoints.

24-inch (610mm) sheave diameter allows for a gentle cable arc. Aluminum sheave construction means durability with less weight. Maximum capacity is 1,500 lbs. (6,672 N). Replacement Sheaves available. See Specifications and Selection Charts on page 105.

Part Number	Description
08637825	24" (610 mm) Overhead Fiber Optic Cable Sheave

Underground Fiber Optic Cable Sheave

The Underground Fiber Optic Sheave has all the features of the Overhead Sheave (above) but with an additional second arm for convenient tie-off. Replacement Sheaves available. See Specifications and Selection Charts on page 105.

Part Number	Description
08637800	Underground Fiber Optic Cable Sheave NOTE: Sheave Size 24" O.D.

Polywater® Lubricant F

Polywater® Lubricant F is a high performance, pourable liquid recommended for long and difficult fiber optic cable pulls. It is slow drying and leaves a lubricating film after its water base evaporates. Polywater F does not stress crack low density polyethylene and is compatible with all types of cable jackets.

Part Number	Description	Std. Pkg. Qty.
08230100	1 Quart (.9 liter) Squeeze Bottle	12/case
08230101	1 Gallon (3.8 liter) Jug	4/case
08230104	2½ Gallon (9.5 liter) Jug	2/case
08230105	5 Gallon (19 liter) Pourable Pail	1
08230155	55 Gallon (208 liter) Drum	1

Polywater® Lubricant WF

Lubricant WF is a non-freezing form of the standard Lubricant F.

Part Number	Description	Std. Pkg. Qty.
08230201	1 Gallon (3.8 liter) Jug	4/case
08230204	2½ Gallon (9.5 liter) Jug	2/case
08230205	5 Gallon (19 liter) Pourable Pail	1

For Cable Blowing Lubricants, see page 128.

CONDUX

TurboSlitter™

The TurboSlitter™ from Condux can easily split HDPE pipe with wall thicknesses ranging from 0.097 to 0.216 inches! Available in two styles, pneumatic and cordless drill attachment. The cordless drill attachment quickly adjusts to fit almost any rechargeable drill, 14-volt and larger. Save time and effort on the job with the TurboSlitter from Condux.

Part No.	Description

PVC & Polyethylene Cutter

Razor sharp cutting blade makes a fast, clean, burr-free cut in PVC and polyethylene. Ratcheting handle provides for sure, steady cutting action. Reduces cutting and preparation time.

Part Number	Description
08948050	Small diameter—up to $1\frac{1}{4}$ " (32 mm) conduit with $1\frac{1}{2}$ " (38 mm) O.D.
08948072	Large diameter—up to 2" (51 mm) conduit with $2\frac{1}{2}$ " (60 mm) O.D.
08948051	Replacement Blade for Small Cutter
08948073	Replacement Blade for Large Cutter

Cable Bender

Bends power cable up to 750 kcmil with a $1\frac{1}{4}$ " (32 mm) maximum cable diameter.

Part Number	Description
08090000	Cable Bender

CABLE CUTTERS

OTHER PRODUCTS

Utility Cable Cutters

Lightweight shear-type cable cutter for copper and aluminum cable. Not intended for cutting steel or ACSR.

Part No.	Description	Cuts (max. kcmil)		Max Dia. (in) (mm)
		Copper/Alum.		
08012300	13" (330 mm) steel handles	350/350	.90	23
08012400	17" (432 mm) 600 V fiberglass handles	500/750	1.03	26
08012500	26" (660 mm) 600 V fiberglass handles	1000/1200	1.40	36

Ratcheting Cable Cutters

Easy one or two handed cutting for copper and aluminum power cables. Specially designed tempered blades combine with positive ratcheting action to cut through most cable. A release lever lets you break free from the load whenever necessary. Hardened steel ratchet teeth resist breakage and will last at least three times longer than inferior ratcheting cutters. Lightweight and portable.

Condux also offers replacement blades for this cable cutter.

Part No.	Description	Cuts (max. kcmil)		Max Dia. (in) (mm)
		Copper/Alum.		
08014000	Cutter	600-750		1 3/4 44
08014001	Replacement blade			

Cable Stripper/Slitter

Condux offers two sizes of the Stripper/Slitter for easy and rapid preparation of round cables from .18 (5mm) up to 1.42 inch (36mm) in diameter and 8 AWG up to 500 kcmil. They feature a spring-loaded cable support arm with a beveled leading edge that assists with insulation removal. The blade swivels to facilitate circular, longitudinal and spiral cuts.

Part No.	Description	Cutting Depth (in) (mm)		Max Dia. (in) (mm)
		(in)	(mm)	
08013000	Small Diameter Stripper/Slitter	.118	3	.18-1.00 5-25
08013050	Large Diameter Stripper/Slitter	.177	4.5	.98-1.42 25-36
08013001	Replacement Blade (fits both sizes)			

GUARD RAILS/SHIELDS

Manhole Guard Rail

Furnished with two steel chains and wing bow locking brace to assure sturdy protection. Painted safety yellow. Freestanding.

Part Number	Description	A Height (in) (mm)	B Length (in) (mm)	C Width (in) (mm)	Weight (lbs) (N)
08043300	Manhole Guard Rail	42 1066	32 812	32.25 819	32 14.5
08043301	Manhole Guard Rail with Shield Clamps	42 1066	32 812	32.25 819	32 14.5

High Impact Polymer Manhole Shield

Constructed of rugged lightweight polyethylene with bright yellow material that resists fading. Will fit 27" (686mm), 30" (762mm) and 32" (813mm) diameter manholes with an inflatable seal that ensures a watertight seal. Designed with four outrigger support gussets that stabilize the shield and is 12" tall to keep water and mud out of the manhole as you work. Can be used with Condux guardrail.

Part Number	Description
08043400	Manhole Shield

Inflate seal until manhole shield fits snugly in the manhole ring. Over-inflating will cause the shield to pop out of the ring.

"Our shop personnel take great care in inspecting our products before they are boxed and shipped. We want to make sure that when our product reaches the field, it's ready to be put to work!"

MANHOLE EQUIPMENT & ACCESSORIES

CONDUX

Cable Racks

Supports cable runs in manholes and vaults. Made of $1\frac{1}{2}'' \times \frac{9}{16}'' \times \frac{3}{16}''$ (38 x 14 x 5 mm) hot rolled steel channel, hot dip galvanized. T-slots for attaching hooks are spaced at $1\frac{1}{2}''$ (38 mm) intervals. The 8, 14 and 18 hole racks have $\frac{19}{32}'' \times \frac{3}{4}''$ (15 x 19 mm) mounting slots at each end that interlock so two or more racks may be combined into one unit. Longer racks are mounted through the T-slots. Use $\frac{1}{2}''$ or M12 mounting hardware (see pg. 154).

Part Number	Support Holes	Length (in)	Bolt Hole Spacing (in)	Length (mm)	Bolt Hole Spacing (mm)

08383800	.5 x 1.25 13 x 32	$6\frac{1}{16}$ 165

Corner Rack Support

To bolt the racks at manhole corners. Mounting bolt holes for $\frac{1}{2}''$ or M12 bolts (see pg. 150). Formed of $1\frac{1}{2}'' \times \frac{1}{4}''$ (38 x 6 mm) steel and hot dip galvanized.

Part Number	Description
08383700	9" x 12" (228 x 305 mm) legs
08383600	12" x 12" (305 x 305 mm) legs

MANHOLE EQUIPMENT & ACCESSORIES

Manhole Ladders

All ladders are manufactured of steel. The rungs pass through the side rails and are riveted or welded. The unique design assures a rung cannot turn.

Features:

- $\frac{5}{8}$ " (16 mm) diameter knurled rungs on 12" (305 mm) centers
- 12" (305 mm) clear between side rails
- $\frac{3}{8} \times 1\frac{1}{2}$ " (10 x 38 mm) side rails, through 12' (3.7 m) lengths
- $\frac{3}{8} \times 2\frac{1}{2}$ " (10 x 64 mm) side rails, 13' (4.0 m) length and above
- Twisted hook is integral part of side rail
- Approx. weight is 5 lbs. (2.3 kg) per foot of length, through 12' (3.7 m)
- Approx. weight is 7.6 lbs. (3.4 kg) per foot of length, over 12' (3.7 m)

Part Number	Description
08381955	Manhole Ladder, 5.5' (1.7 m) long
08382100	Manhole Ladder, 8.0' (2.4 m) long
08382300	Manhole Ladder, 10.0' (3.0 m) long
08382500	Manhole Ladder, 12.0' (3.7 m) long
08382700	Manhole Ladder, 14.0' (4.3 m) long
08382900	Manhole Ladder, 16.0' (4.9 m) long
08384200	Manhole Ladder, 20.0' (6.1 m) long

Ladders are hot dip galvanized. Rated at 300lbs (136kg).

ORDER CAREFULLY!
This item is made-to-order and is not returnable.

Manhole Ladders—Wall Mount

All ladders are manufactured of steel. The rungs pass through the side rails and are riveted or welded.

Features:

- $\frac{5}{8}$ " (16 mm) diameter deformed rungs on 12" (305 mm) centers
- 14" (356 mm) clear between side rails
- $2 \times 1 \times \frac{1}{8}$ " (51 x 25 x 3 mm) channel side rails
- Furnished with 4 unattached floor/ceiling brackets - 7" (178 mm) offset standard
- Wall mounting brackets may be used
- Approx. weight is 5.5 lbs. (2.5 kg) per foot of length

Part Number	Description
08382001	Manhole Ladder, wall mount, 7.0' (2.1 m) long
08382101	Manhole Ladder, wall mount, 8.0' (2.4 m) long
08382301	Manhole Ladder, wall mount, 10.0' (3.0 m) long
08382501	Manhole Ladder, wall mount, 12.0' (3.7 m) long
08382701	Manhole Ladder, wall mount, 14.0' (4.3 m) long
08382901	Manhole Ladder, wall mount, 16.0' (4.9 m) long
08384101	Manhole Ladder, wall mount, 18.0' (5.5 m) long
08384201	Manhole Ladder, wall mount, 20.0' (6.1 m) long

Optional Floor/Ceiling Brackets

Part Number	Description
08382902	7" (178 mm) offset

Pulling-In Irons

Set into the walls of the concrete manholes opposite all duct entrances to provide a strong, convenient attachment for pulling-in blocks when installing or removing cables. Manufactured with $\frac{7}{8}$ " (22 mm) diameter steel and hot dip galvanized.

Part Number	Description
08383002	9" (228 mm) w/opposing bends
08381300	12" (305mm) w/ retainer
08381301	12" (305 mm) w/cross bar & retaining plate
08381302	12" (305 mm) w/opposing bends

Expansion Anchor

For use in pre-drilled holes. Plug expands as anchor is driven into it making a solid hold in concrete.

Part Number	Description	Allowable Working Loads*			
		Tension (lbs)	(N)	Shear (lbs)	(N)

QUICKTENT

OTHER PRODUCTS

The Condux QuickTent

The Condux QuickTent is a portable, freestanding work shelter suitable for use in all kinds of weather conditions. Designed for one person to set up in a matter of seconds, the Condux QuickTent features a fiberglass frame and urethane coated nylon cover that will provide years of dependable service. The QuickTent comes in five sizes, each of which provides a roomy working environment, and folds down to fit into a small, lightweight carrying bag which is sewn into the tent. Other features include:

- Roll-up door with velcro or zipper closures
- Window / vent with closing flap
- Exhaust port
- 12" (305 mm) skirt around the base
- Built-in wind lines for tethering

Return Freight Prepaid

Limited Warranty

Condux International, Incorporated extends the following warranty to the original purchaser of these goods for use, subject to the qualifications indicated: Condux International, Inc. warrants to the original purchaser for use that the goods or any component thereof manufactured by Condux International, will be free from defects in workmanship for a period of 1 year from the date of purchase* provided such goods are installed maintained, and used in accordance with Condux International, International's and the original manufacturer's written instructions.

Components not manufactured by Condux International, but used within the assembly provided by Condux International, are subject to the warranty period specified by the individual manufacturer of said component, provided such goods are installed, maintained, and used in accordance with Condux International's written instructions. Condux International's sole liability and the Purchaser's sole remedy for a failure of goods under this limited warranty, and for any and all claims arising out of the purchase and use of the goods, shall be limited to the repair or replacement of the goods that do not conform to this warranty.

To obtain repair or replacement service under the limited warranty, the purchaser must contact the factory for a Return Material Authorization (RMA). Once obtained, send the Return Material Authorization along the defective part or goods to: Condux International, Inc. 145 Kingswood Drive, Mankato, MN 56002, U.S.A. freight prepaid.

THERE ARE NO EXPRESS WARRANTIES COVERING THESE GOODS OTHER THAN AS SET FORTH ABOVE, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO ONE YEAR FROM DATE OF PURCHASE.

CONDUX ASSUMES NO LIABILITY IN CONNECTION WITH THE INSTALLATION OR USE OF THE PRODUCT, EXCEPT AS STATED IN THIS LIMITED WARRANTY, CONDUX WILL IN NO EVENT BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES.

*Except for the 819 Directional Drilling Swivels, 400 Series D.Drill Directional Drilling Swivels, PE/PVC Pulling Eyes, Directional Drilling Break-Away Swivels and Ground Rod Drivers, which carry a 90 day limited warranty.
