## 12 Tonne Cutting Die

#### Part No. 00949

Material	Size (mm) OD
Guy Wire/Soft Steel/ Steel Rod	16.0
ACSR/AL/CU	17.5

#### Features

- Can be used on all 12 Tonne "C-Head" style Crimpers
- Heavy duty design

#### **Benefits**

• Lower cost than standard dedicated cutting tools

Suitable for all brands of 12T battery, manual and remote head hydraulic compression tools

Please Note: This die selection chart is produced as a guide only. Please check with your Lug/Link manufacturer for AF sizes and tonnage.

#### 12 Tonne Copper Earth Connector Dies - K12 Series

Selecting the correct "C" type earth connector Compression Die is directly related to the style of "C" connector and the sizes of copper earth wire and/or earth rod being connected. Below are the most common types of "C" Connectors and the corresponding 12T Dies. These connectors are specifically designed for applications requiring corrosion resistant, high current jointing or tapping of buried copper earth grids, or to earth rods in zone substation and for pole and pad mounted transformers, therefore die selection is extremely important. The most common ranges of connectors are typically dimensionally identical in the Australian market.

#### 32mm Remote Control Cutter, AL/CU - Klauke

#### Part No. ES32RMCCFM

When cutting overhead lines, there is always the risk of coming into contact with the tool or an electric arc from a live adjacent conductor. With the new Klauke remote controlled cutting tool you remain on the ground at a safe distance.

#### Features

- LED Display
- Sunrise Adaptor suits universal & telescopic sticks
- Operation can be switched between manual / remote
- Open head is rotatable 330°
- Ergonomic balanced centre of gravity, even when used with a telescopic hot-stick pole
- LED for work area illumination
- Quick motor stop for high user safety
- Automatic retraction when operation is complete
- Saves energy: motor stops after the operation
- Simple one-hand control via remote control
- Powerful Makita battery enables longer on-site operation between charges

# Insulated Battery Tools Your Safety is our priority

Klauke's Orange Line series of battery powered hydraulic cutting and crimping tools are the world's first of their kind, offering protection from electric shocks up to 1000 V. The TRI-INSULATION BARRIER, developed in-house, prevents voltage discharging between tool head and tool body. Every single tool is tested for compliance with the electrical requirements of IEC 60900 in their production process. This guarantees voltage protection up to 1000V.

TRI-INSULATION BARRIER

- 1. CREEPAGE DISTANCE CLEVER DESIGN ENSURES MINIMUM 12.5MM DISTANCE BETWEEN NON INSULATED PARTS
- 2. PA6 INSULATION PLASTIC HOUSING MATERIAL WITH EXCELLENT INSULATING PROPERTIES
- 3. DIELECTRIC OIL HYDRAULIC OIL WITH HIGH DIELECTRIC INSULATING PROPERTY

- VDE tested and certified up to 1000V in accordance to the electrical requirements of IEC 60900.
- Insulation from the head provides protection for the operator.
- Bright Orange rubberised body provides non slip protection and differentiates from standard tools.

Working on or near live low-voltage parts up to 1000V is often part of every day work in certain sectors. The use of insulated manual hand tools in tight workspaces and exerting the force required to operate insulated manual hand tools poses a safety risk to the operator.

Klauke Orange tools offers battery-powered cutting and crimping that can significantly reduce operator risk by improving precision and safety in these hazardous work conditions.

Klauke Insulated Tools provide a safer option

### Pistol Style Cutters 65 & 105mm - Remote Controlled

#### Part No. ESG105RMCCFM - ESG65RMCCFM

- Large (105mm) & Medium (65mm) diameter remote controlled cable cutter
- Same performance as the standard (105) counterpart but adds a safe work environment
- Ideal for hard to access trenches and manholes by creating adequate distance between possible live conductors and the operator

#### **Features**

- Unique End Position Control Emits a sound on the remote to indicate a successful cut. Safer than relying on the Maximum Hydraulic pressure indicator or gauge
- Remote control will only operate when the tool trigger is locked by the Spring Ring

#### Woodpecker Impact Auger Bits are engineered to deliver fast, clean cut holes in Australian hardwood power poles.

The new, improved high grade steel alloy is designed for a longer bit life, staying sharper longer. Featuring a single, heat treated and tempered cutting edge for fast, effortless

boring in hardwood. The clean cut of these bits allows easier removal from the pole and helps bolts to slide through with less resistance.

The design is optimised to cut quickly through hardwood with an aggressive lead screw pulling the bit through the material more easily while the wider flute design quickly ejects the chips to clear the hole. This helps to reduce heat, leading to overall faster drilling speeds and longer tool life.

#### **Features**

- Designed to drill cleaner and faster holes in Australian hardwood poles
- 1/16" Quick change hex shank suitable for electric drills or impact wrenches
- Optimum shaped wide cutting flute ensures a faster chip ejection, less friction and a longer lasting cutting edge
- Solid core for added strength, auger stability and extended tool life
- Supplied in a protective storage case

**Designed to drill the Toughest Australian** Hardwoods

#### Part No. 2403

- Super Heavy Duty 7/16" (1/2" Square Drive) Quick-Change Chuck.
- Three ball bearing system to firmly secure you auger bits and adapters.
- Designed to be used with high torque ½" square drive impact wrenches.

### Chain Saw, Long Reach - Foam Filled

#### Part No. REL-LR-Series

Reliable's REL-LR-62-TEN-A long reach hydraulic chainsaw are intended for safely cutting and trimming trees from the ground or an aerial bucket. The powerful hydraulic drive motor can easily make cuts up to 330mm in diameter. With an overall length of 1600mm (Also available 1900 & 2250mm), the operator may easily reach areas not possible with a standard chain saw.

Features include a trigger guard and safety trigger to prevent accidental movement of the chain, a covered sprocket guard, and a rubber collar hand stop. A quick set spool can be turned 180 degree for closed center/open center operations.

#### Features

• Powerful hydraulic drive motor

# • EZ selector valve allows change between open and closed centre systems without tools

- Foam filled fibreglass shaft to prevent ingress of moisture and provide additional electrical safety protection
- Trigger guard, sprocket guard, rubber hand guard and scabbard
- Flush face couplers fitted

### Tamper, Pole Hydraulic - Reliable

#### Part No. REL-TMP-Series

Makes quick work of setting poles, asphalt patch and general construction backfill compacting. Only 3 moving parts for low maintenance.

Reversible On/Off valve for Open and Closed-Center systems (hose-end models). Standard with kidney-shaped foot. Rotate trigger selector for Open and Closed-Center systems (valve on tube models). Used for setting poles and general backfill compacting

- Standard kidney shaped foot included on all models
- Only three moving parts reduces servicing time
- Change between open and closed centre systems
- Flush face couplers fitted
- Hose End Valve & Valve on Tube options available

The Tamp-Safe handle was designed by a professional linesman for the safety of utility workers.

Tamp-Safe handles are built with safety in mind. It puts the operator's hand in a safe position away from the hydraulic hoses.

Our innovative handle is designed to attach to most hydraulic tampers, including Reliable, Greenlee/Fairmont, and Stanley tampers.

### Pole Pullers, Hydraulic

### 56 Tonne Hydraulic Pole Puller

#### Part No. PP-60-XHD

- Dual Cylinder Pole Puller
- 600mm hydraulic cylinder stroke
- High capacity, hydraulic powered
- Pulling utility poles up to 700mm diameter
- Force of 56 Tonne
- Grips the pole with cam-action heads
- Cam action head has bevelled teeth to provide a better grip
- Use with open-centre or closed-centre hydraulic systems
- Fitted with 7.5m hydraulic hose
- Features built-in fork pockets, 2 lifting points on the head and high strength alloy chains
- Increased stability due to larger footprint
- Increased gripping capability ensures chain does not slip up pole
- Utilises existing low pressure tool circuit on lifter borer-crane
- Hydraulics: Required flow rate 5-15 gpm @ 2,250PSI max.
